plans for major expansion of EU

The European Commission has unveiled a blueprint for creating a European Union of almost 500m people stretching from Barcelona to Bucharest and the Baltic states. In a 1,300 page report the Commission called for radical reforms to the Common Agricultural Policy, tighter rules on aid to poorer regions, and a further constitutional conference to prepare for a Union of more than 20 member states.

Annan seeks UN reforms: United Nations secretary-general Kofi Annan has produced a reform plan for the UN, billed as the biggest change in the organisation's 52-year history. It received a warm greeting from the Clinton administration, but was dismissed by some members of the US Congress as too little, too late. Mr Annan wants to cut bureaucracy by merging or eliminating seven divisions of the secretariat. Page 12

UK bank shares surge on: Shares to UK banks hit new heights as investors shrugged off worries that the economic cycle might have started to turn against the financial sector. With first-half results for most large UK banks due next month, HSBC, the world's largest banking group, gained 3.1 per cent to 2151p, and Lloyds, National Westminster Bank and Barclays also powered ahead. Page 13

Hunt for Versace murder suspect: US police are hunting suspected gay serial killer Andrew Cunanan, the only suspect in the mur-der of Gianni Versace outside his Miami Beach mansion. Cunanan, 27, who was already on the FBI's 10 Most Wanted list, and has been charged in murders in three other states. Police say they have numerous leads

Calls for corruption probe in Ireland: ireland's government is under opposition pressure for a new investigation into payments to politicians, covering the period while Charles Haughey was prime minister in the 1980s. The present prime minister Bertie Ahern has warned he will root out any wrongdoing. Page

Shanghal industry suffers: Shanghai's economic growth has been marred by a sharp profits fall in the city's industrial sector and more losses by state-owned enterprises in the first half of this year. Shanghai's industrial sector saw s 12.1 per cent drop in profits compared to 1996. Page 6

EU approves genetic patents: The European parliament has approved a controver-

sial directive aligning EU rules on the patenting of genetic material with those of the US and Japan. But members of the parliament added several amendments aimed at allaying fears r the ethics of genetic nat

Report into tanker disaster: The Sea Empress disaster, which spilled 72,000 tonnes of oil into the sea off south Wales when the tanker ran aground in February 1996, was the result of a catalogue of mistakes starting with a mistudgment by the pilot guiding the ship into harbour, the official accident report said. Page 7

Netahnyahu defies UN: Israeli prima minister Benjamin Netanyahu has brushed aside a UN resolution calling on its members to discourage any activities contributing to the construction of Jewish settlements in the occupied territory. Despite mounting international criticism, Mr Netanyahu said the resolution at an emergency special session of the General Assembly was "a red herring" and a "non-issue". Page 4

Kodak earnings shock Wall St; Eastman Kodak shocked Wall Street with poor earnings for the second time in three months. Shares to the company - until recently on track for one of the most impressive US corporate turnarounds of the 1990s - fell by 10 per cent. The company also warned about the outlook for the rest of this year. Page 13

Raisio shares up again: Shares in Finnish food and chemicals group Raisio have gone up another 18 per cent in the wake of Tuesday's announcement that its cholesterol-cutting margarine, Benecol, would be marketed to the US by Johnson & Johnson. Page 13, Lex Page 12

Antarctic poliution falls: Lead pollution has declined drastically in Antarctica, as motorists in the Southern Hemisphere switched to lowlead and lead-free petrol.

Brussels unveils | European markets reach new highs I Investors buoyed by US inflation figures

Bulls drive Dow through 8,000

By Gerard Baker in Washington and Philip Coggan in London

The Dow Jones Industrial Average passed the 8,000 level for the first time yesterday as stock markets around the world continued their phenomenal bull run.

Another bout of benign economic figures, with core US consumer prices rising only 0.1 per cent to June, reassured investors that the era of low inflation and low interest rates was set to continue. Low yields on bonds and cash have encouraged investors around the world to buy shares, pushEurope to all-time highs.
The Dow jumped to 8,000

after only 12 minutes of trading, slipped back in response to poor results from Eastman Kodak, then rebounded to reach 8,004.97, up 29.26, by 1pm New York time. The yield on the benchmark 30-year Treasury bond dropped below 6.5 per cent, its lowest level since last December.

"The Fed is on hold for the present," said Mr Mickey Levy, chief economist at Nations Bank in New York. "Any thought of tightening is definitely on the back burner."

Other markets came close to

barriers yesterday. In London, the FTSE 100 index looked briefly as if it would top the 5,000 mark, while in Paris, the CAC-40 came within sight of 3,000, closing at 2,988.01.

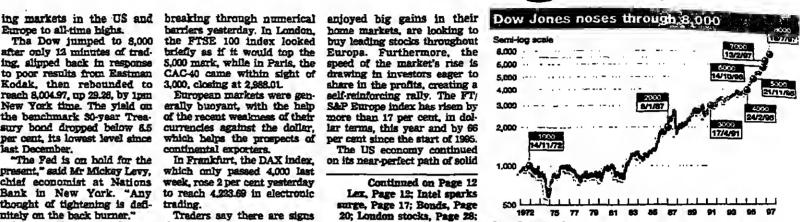

European markets were gen-

erally buoyant, with the help of the recent weakness of their currencies against the dollar, which helps the prospects of continental exporters. In Frankfurt, the DAX index, which only passed 4,000 last week, rose 2 per cent yesterday

to reach 4,223.69 in electronic trading. Traders say there are signs that US investors, having

home markets, are looking to buy leading stocks throughout Europa. Furthermore, the speed of the market's rise is drawing in investors eager to share in the profits, creating a self-reinforcing rally. The FT/ S&P Europe index has risen by more than 17 per cent, in dollar terms, this year and by 66 per cent since the start of 1995. The US economy continued on its near-perfect path of solid

GDP continues to shrink

By Chrystia Freeland

The Russian economy continued to shrink in the first half of this year, defying Kremlin promises of growth. According to official figures released this week by the State Statistics Committee, gross domestic product contracted by 0.2 per cent from January to June, continning a negative trend which has seen the economy shrink by 39 per cent since

The figures cast doubt on the triumphant announcements of senior Russian leaders earlier this month that the economy had begun to grow. Mr Victor Chernomyrdin, the prime minister, said at the beginning of the month that GDP bad bonuced back by 1 per cent in the first half of the year, His optimism was picked up by President Boris Yeltsin, who assured Russians a few days later that the coun-

try's economic collapse had Economists said the disappointing figures reflected continued structural barriers to growth, including prohibitive taxes and regulations. But they also pointed out that the official statistics might be understating activ-

ity in the real economy. "Borrowing is still very expensive, and the tax system and regulation are ver serious problems," said Mr Anders Aslund, an economist at the Carnegie Endowment. "I think we are at the beginning of a recovery, but would expect it to be quite slow, given the structural

problems." However, Mr Aslund also said official statistics might be overstating the severity of Russia's problems, in part because of the difficulties of fully capturing developments in the country's buge shadow economy.

After fiercely contested presidential elections last year and the stabilisation of Russia's currency and inflation rate, western and Rus-sian officials have taken to predicting that the economy is on the verge of a period of buoyant growth.

These optimistic expectations are one factor behind a raging bull market in securities, with foreigners pouring as much as \$1bn a month

into Russian stocks. But, according to Mr Al Breach, a Moscow-based economist at the Russian European Cantre for Economic Policy, an EU-funded think tank, the economic pickup has been slower than expected, in part because of the continued reluctance of

Russian banks to invest in the real economy. In an effort to stimulate investment, the government has waged an aggressive campaign to force down once sky-high interest rates on government securities. The effort has brought rates down to under 20 per cent a

W UKRAINE POLITICS

Kuchma ally named as PM

Ukraine's parliament confirmed Mr Valery Pustovoitenko, a political pragmatist, as prime minister yesterday. He won 226 votes, just attaining the absolute majority he needed in the 450-seat chamber. Ninety-one deputies voted

A close ally of President Leonid Kuchma, Mr Pustovoitenko promised Ukraine would stay on the track of economic reform. His main priorities would be stimulating private enterprise, reducing taxes and diminishing the size of the shadow economy, estimated in Ukraine at 40-60 per cent of the whole economy.

Mr Pustovoitenko replaces Mr Pavio Lazarenko, who resigned earlier this month. Mr Kuchma said he had been unhappy with Mr Lazarenko's performance. Reuter, Kiev

III FLOODS IN POLAND

Call for emergency aid

The Polish government vesterday asked parliament to approve 2.5bn zlotys (\$760m) worth of emergency financing from the central bank (NBP) to fund flood relief. Mr Wlodzimierz Cimoszewicz, the prime minister, sald the loan would not inflate this year's 12.2bn zlotys budget deficit. The loan would be used only to cover cash shortfalls whenever the finance ministry encountered difficulties in switching funds from existing budget projects to relieve hardship.

The bank has said it is ready to provide a 1bn zloty one-year loan to the government. The World Bank is also reported to be preparing a \$300m reconstruction loan. The government is pledged to keep this year's budget deficit at 2.8 per cent of gross domestic product. Fears that it would be forced to breach its target led to a speculative run on the zloty on Tuesday. It lost more than

per cent in value but firmed by 1 per cent yesterday. Mr Cimoszewicz told parliament the floods, which were now abating, had left 35 dead and forced the evacuation of more than 132,000 people. Christopher Bobinski, Warsow

BASQUE SEPARATISM

Juan Carlos condemns Eta

King Juan Carlos of Spain yesterday branded Eta Basque terrorists" for killing a volt politician. It was one of the strongest condemnations of the separatists by the king, who normally tries to stay out of politics. "His murder was as contemptible as the terrorists who killed him," the king said during a speech

in Berlin which was broadcast on Spanish national radio. He added his voice to a nationwide outery against Eta for its abduction and killing of Miguel Angel Blanco, a 29-year-old Basque town councillor, after the government refused the group's demand for a transfer of prisoners. Millions of Spaniards vented their rage with

unprecedented force in four days of mass protests across the country. Four Eta prisoners have written letters condemning their own organisation. The government said it knew the demonstrations were a call for action and vowed to crack down. Agencies, Madrid

III GERMAN JOBS

Unemployment 'stabilising'

Germany's unemployment has peaked and is likely to average just under 4.3m this year, but it remains unclear if and how soon the situation will improve, Mr Bernhard Jagoda, head of the Federal Labour Office, said yesterday in an interview with Die Welt newspaper. Last month'a decline in west German unemployment was better than usual for that month, he said.

"We are seeing first signs of a stabilisation," said Mr Jagoda. "Whether and how quickly the upturn will come remains open." He added that it was no aurprise the economic recovery was failing to spur job creation because productivity gains were outstripping growth in

gross domestic product.
"We need a reduction in the public share of the economy, deregulation, innovations, a reduction in overtime, flexible working hours. But it's not enough to talk about it. We need to act."

interest rates for the first time since late 1994 in response to a steady depreciation of the krone during the past four weeks. The deposit and overnight rates were increased by 0.25 percentage points to 3.5 and 5.5 per cent respectively. The move contrasted sharply with events earlier this year. when the bank cut interest rates twice in a week and purchased large amounts of foreign currency in a vain attempt to dampen a

Norway's central bank

yesterday raised official

surging krone driven by Norway's booming offshore economy. The krone firmed from Nkr4.19 to NKr4.15 against the D-Mark following the announcement but analysts said the interest raise may prove insufficient.

The krone had fallen almost 9 per cent against the inverse European currency unit index since mid-June. The depreciation reflected investor worries about inflation, weaker oil prices and the outcome of September's general election.

Mr Jens Stoltenberg, finance minister, said the rate rise was necessary to maintain Norway's monetary goal of a stable krone against European currencies. Last month the bank sought to stabilise the krone by torposing fixed interest rates for fixed-term deposits, in place of its usual auction procedure. Greg Mcloor, Stockholm

Günes Taner, economy minister, tells John Barham how Russian he is intending to put a rein on a runaway situation

Union faces its greatest challenge as it charts expansion course into next century

No turning back from brave new Europe

By Lionel Barber in Strasbourg

Now there is no turning back. With the publication of Agenda 2000, the European Commission's 1,300-page blockbuster on enlargement, the historic process of admitting 10 former Soviet bloc countries into the European Union is finally underway.

Agenda 2000 marks tha end of Old Europe, the intimate Clnb of Six built 40 years ago around France, Germany, the Benelux countries and Italy. The vision of an ever closer Union is shifting towards the looser confederation of nation-states favoured by Britain

The new Europe will have a longer frontier with Russia as well as borders with Ukraine, Belarus and Moldova. It will enjoy direct access to the Black Sea and closer contacts with the Caucasus and Central Asia. The EU's own population will increase by one-third to countries, knowing that this nearly 500m people; but total gross domestic product will rise by barely 5 per cent.

"Europe's cultural diversity will be a source of creativity and wealth. The accession of new memberstates will enhance the Union's weight and influence internationally," says Agenda 2000, "but the sheer number of applicants and tha very large differences in economic and social development will present the Union with institutional and political challenges far greater

Moreover, the EU today is hardly at ease with Itself. More than 18m people are out of work. Public support for further integration is fragile. Economic and monetary union looks within reach but is still not a done deal. Only last month, EU leaders ducked the very institutional reforms necessary to manage a Union of more than 20 members.

This is the background to the Agenda 2000 blueprint which Mr Jacques Santer, president of the European Commission, presented to the European Parliament in Strasbourg yesterday. He trod carefully, well aware that EU governments have the last word on the Commission's recommendations. The first area of conten-

countries should join Cyprus early next year in the first wave of countries negotiating to join the Union. The favoured five are the Czech Republic, Poland, Hungary, Estonia and Slovenia.

Mr Hans van den Broek, Dutch commissioner in charge of eastern enlargement, resisted pressure from insida and outside the Commission to restrict the shortlist to the Czechs. Poles and Hungarians, who were invited last week to join tha Nato alliance

Swedes are pressing for accession negotiations to begin with all 10 applicants. This is a gesture to the two disappointed Baltic states of Latvia and Lithuania rather than to Bulgaria, Romania and Slovakia. France may be tempted to champion tha cause of the new reformist government in francophile Romania; others may call for a negotiation with all 10 could be a recipe for delaying the proce

tion is money. Net recipients from the EU budget such as Spain are sceptical about Commission claims that enlargement can be funded without any real increase in EU spending beyond the celling of 1.27 per cent of EU gross domestic product planned for 1999, "We don't believe in the feeding of the five thousand," said a senior Spanish diplomat. "There are not enough loaves and fish to go round."

Yet the British, French,

tighter rules on eligibility for Brussels funds. "This rationalisation has nothing to do with enlargement," said Mrs Monika Wulf-Mathies, EU regional affairs commissioner, yesterday. "We would have to do it anyway." But Mrs Wulf-Mathies has heeded Spain's warnings that it will not tolerate any tampering with the multibillion dollar Cohesion Fund.

But the Danes, Rinns and

The second bone of conten-

Germans and Dutch are adamant that there should be no increase in national contributions to the next EU budget, which will run from 2000-2006. Indeed, the Germans and Dutch are threatening to copy Mrs Margaret Thatcher's successful campaign in the early 1980s to cut Britain's contribution. Agenda 2000 proposes

Finance

pulls in from member-states. The financial framework the Commission published yesterday, which sets the spending guidelines for 2000-2006, reflects the harsh new realities of EU politics.

Member-states, sweating under the strain of meeting the criteria for economic and monetary union, are in contributions to finance new members.

"You saw how difficult it was to change the [EU] Treaty at iast month's Amsterdam summit," savs Mr Erkki Lilkanen, budgetary commissioner, who has brought a new prudence to Brussels accounting. "Getting EU states to pay more money is even more difficult."

The Commission's seven-year pian assumes annual economic growth of 2.5 per cent in existing EU states, and 4 per cent in applicant countries. At constant 1997 prices, it projects that EU spending will increase from Ecu94.1bn (\$103.51bn) to Ecul 11.4bn over the period. Crucially, the ceiling on

EU spending of 1.27 per cent of member states' total gross national product. originally agreed only until 1999, will be kept. The ceiling was agreed at the 1992 Edinburgh summit as part of the so-called "Delors II" budget package.

In fact, from 2002 onwards. EU spending is projected at only 1.22 per cent of EU GNP. This leaves what Mr Liikanen calls a "margin for surprises", equal to about Ecn4bn.

Biggest item of expenditure will remain the Common Agricultural will only succeed if It Policy, although this, too. will grow by less than the existing ceiling of 74 per cent of annual GNP growth.

The increase reflects the net cost of shifting from a development and measures and costly and inefficient food-

Selling them to sceptical farmers, and to states such as Germany and France with powerful farm lobbies, will demand all the diplomacy and bonhomie of the one-time Austrian hill farmer. Mr Fischler insists that, after a "period of reflection", farmers will

accept his argument that there is Without reform - and even · · · the previous record. The beaf

"Moreover, new World Trada

compensate farmers for the gap between internal and world

Mr Fischler's solution builds upon, but goes far beyond, a previous reform of the CAP in 1992. Ha wants to cut intervention prices, the levals at which EU authorities step in to buy surplus stocks on the market. These provide an effectiva price guarantee, encouraging farmers to produce regardless of demand.

From 2000, cereal support prices would be cut by 20 per cent, beef 30 per cent, and dairy prices 10 per cent. These are on top of respective cuts of 30, 15 and 5 per cent achieved by the 1992 reforms. Compensation paymants created in 1992, per tonne of cereal or

new payment levels are calculated to fully compensate beef farmers support prices will save Ecu3.7bn for lost income, and cereal farmers for about 80 per cent.

The lower figure for cereal farmers reflects the fact that they have been over-compensated by some Ecustra (\$8.8bn) since 1992, after grain prices fell less than expected. The reformed CAP will have mechanisms to prevent similar over-compensation.

But, says Mr Fischler, the real prize for farmers is the chance to export freely. "Farmers must be competitive,

they must become entrepreneurs for the future," he says. That will provide incentives for farmers to concentrate on quality rather than quantity, and to respond to consumer demand for organic products and environBrussels forecasts that cutting a year, but extending direct aid will cost Ecu7.7bn - pushing up the net cost of the CAP by Ecu4bn annually. On top of that would be Ecu2hn in naw rural payments aimed at creating alternative job

But, officials say, the increase remains within EU spending targets, and would be cheaper than funding new food mountains, It also shifts the burden of supporting farmers from higher consumer prices to direct aid, ultimately paid ont of taxes. While the reforms are designed

to prepare for enlargement to the east, the Commission makes clear farmers from new entrants will not immediately enjoy the same direct aid as existing EU farmers.

chler says eastern European regions, will increase from states will need a transition Ecu35.2bn to Ecu42.8bn, but period of five to 10 years before stay at the Edinburgh level full integration into the CAP. Netanyahu shrugs off JN threat

By Judy Dempsey

Mr Benjamin Netanyahu, the Israeli prime minister, yesterday brushed aside a United Nations resolution that called on its members to discourage any activities contributing to the construction of Jewish settlements in occupied territory.

Despite mounting internayahu said the resolution at an emergency special ses-sion of the General Assembly was "a red herring," and 131-3 with Israel, Micronesia and the US voting against it. There were 14 abstentions for the resolution, which was sponsored by 15 Arah and Moslem nations.

But there is growing con-cern in Israel that such criticism could harden in coming weeks if peace talks with the Palestinians are not resumed and if construction work for Har Homa in east Jerusalem

is not stopped. Israel's diplomats are also increasingly concerned about their country's image. Until recently, thay said they had been sending back highly critical reports to the order to achieve peace. foreign ministry about reacand the impasse in the neace talks. However, senior diplocomplaining and being criti-

cal," a move which suggests that the Likud government is unwilling to listen to its senior embassy staff. Tha UN resolution, the

third from the General Assembly this year to crincise the building of settlements, was noticeably tougher in its language, signalling growing impatience with Israel's intransigence. So far the language has not tional criticism, Mr Netan- been translated into action. However, the resolution also demanded that Israel "make available to member states the necessary information about goods produced or manufactured in the illegal settlements," which according to diplomats could imply moves towards a boycott.

Mr Bill Richardson, US ambassador to the UN, said the demand for a "partial economic boycott of Israel" ran counter to building blocks for the peace process The resolution would not "serve the cause of peace in a new Jewish settlement at the Middle East," he added.

But Mr Ehud Barak, leader of the opposition Labour party, who yesterday beld talks in Cairo with Mr Hosni Mubarak, Egyptian president, said Israel must be ready to compromise in

curbs row goes to WTO

Three of India's main trading partners have complained to the World Trade Organisation about New Delhi's extensive import controls on consumer goods.

Tha US, Anstralia and Canada filed formal complaints through the WTO's dispute settlement system. Their move follows the breakdown of talks on phasing out the curbs. The European Union is expected to follow suit tomorrow. If no agreed settlement is reached within 60 days, the com-plainants can ask for a neutral panel to rule on a timetable for ending restrictions.

At a meeting of the WTO's halance of payments committee on July 1. India offered to dismantle controls on 2,700 items over seven years rather than the nine years it first proposed. But the Indian plan left many "hig ticket" items such as cars and grains until the to western trading partners which had sought a two-to-

three year phase-out. An IMF report in January said India no longer faced acnte balance-of-payments problems and had healthy foreign exchange reserves, which meant it could no longer justify the import restrictions under the WTO's bal-Quantitative controls are normally forhidden uuder WTO rules.

India has agreed in principle to phase out the controls, in place for four decades, but says it needs to do this gradually to minimise the impact of a surge of consumer

AMERICAS NEWS DIGEST

Venezuela oil prices up 27%

Venezucia today will increase petrol prices by an average of 27 per cent in preparation for the opening of its domestic petrol market. The price adjustment is considered a prerequisite to the extension of an International Monetary Fund slandhy agreement, expected to be signed later this month. The increase fell short of IMF demands that the petrol price be the same as its export price.

The government has been hesitant to comply with such demands because of the political cost in ull-rich Venezuela, where motorists fur decades have enjoyed highly subsidised fuel. Sharp petrol price increases in 1989 sparked street riota and looting, leaving hundreds dead in the capital Caracas. Yet despite a nearly 500 per cent increase in April last year, petrol is still cheaper than a bottle of mineral water.

The secretary-general of the leading labour federation CTV, Mr Carlos Navarro, said: "The government is committing a serious mistake in midst of attempts to reform the social security system." The CTV said the price adjustment could cause social tension and that It Raymond Colitt, Caracas would seek its annulment.

By Laura Tyson in Taipei

Taiwan yesterday approved sweeping constitutional changes bringing the island a step closer to formally declaring independence from mainland China. The controversial reforms are likely to annoy Beijing, which regards Taiwan as a rehel province eventually to be brought under its control.

After months of horse-trading, the ruling Nationalist party, supported by the leading opposition in the National Assembly, passed constitutional revisions freezing the provincial gov-The provincial govern-

ment is a symbol of Taipei's long standing claim to represent all of China of which Taiwan is just one province. Its removal would be interpreted by Beijing as an assertion of Taiwan's independence.

The move paves the way for the eventual dismantling of the provincial government, starting with the cancellation of elections for the powerful post of provincial governor and the provincial assembly.

The government argues that the provincial apparatus, with dozens of Incrative enterprises and several hundred thousand employees within its purview, is an unnecessary drain on the country's economic resources.

However, Its abolition has long been supported by the leading opposition, the Democratic Progressive party (DPP), which advocates Taiwanese independence and regards the scrapping of the provincial apparatus as a symbolic step towards independence.

The revisions would also in effect reduce the post of credits to the 75 finance premier to that of presidential chief of staff, possibly paving the way for a promised cabinet reshulfle and the resignation of Premier Lien Chan, He is likely to be repaced by Mr Vincent Siew. a legislator and former plan- ance of payments crisis.

Shanghai industrial profits slide

ASIA-PACIFIC NEWS DIGEST

Seoul warns on border shelling

South Korea warned yesterday it would not tolerate any more North Korean "provocations" after two sides exchanged gunfire for half an hour in one of the worst clashes in recent years.

Seoul said the North used heavy weapons, possibly mortars or artillery, after South Korean troops fired warning shots when several northern soldiers approached their positions in violation of the armistice that ended the 1950-53 Korean war. Pyongyang radio said the North Korean soldiers were carrying out normal reconnaissance when the southern troops opened fire. The North claimed some of its soldiers were wounded.

Political analysts in Seoul speculated that Pyongyang might have staged the incident to gain concessions befure preparatory talks with the US. South Korea and China in New York on August 5. John Burton, Seoul

HK ARRESTS

Banker on fraud charge

A former senior private banker at Merrill Lynch was yesterday charged by Hong Kong police with dealing with proceeds gained from illegal activities. Mr Kevin Wallace, who was fired by the US investment bank last in May. was arrested by Hong Kong's Commercial Crime Bureau
- along with an unidentified local man - on July 6. Both were granted police hail.

Mr Wallace, a 46-year-old American, appeared in court yesterday and was charged with one count of fraud related to "dealing with property known or believed to represent proceeds of an indictable offence," according to the government prosecutor.

The charge is in relation to a bank transfer of about HK\$7m (\$910,000). A three-month adjournment, requested by the prosecutor in order to make inquiries in Singapore and Australia, was granted. Mr Wallace will reappear in court on October 18. Louise Lucas, Hong Koro

AIRLINE SUED

\$1m for KAL 007 victims

Korean Air was yesterday ordered by a court in Japan to pay Y130m (\$1.14m) damages to the families of four Japanese who died when its flight KAL 007 was shot

down by a Soviet fighler in 1983 in the Russian Far East. The judge said yesterday the airline had been negligent in letting the aircraft stray into Russian airspace. In the atmosphere of the Cold War at the time, any Intrusion into Russian air space was likely to be viewed as a provocative step, the court said. The ruling marks one of the final chapters in the saga, which provoked international controversy because of the cold war Gillian Tett, Tokyo

UK NEWS DIGEST

Jobs figures fuel rate fears

The UK economy is generating jobs at an increasingly rapid pace, according to data published yesterday amid growing fears of a further rise in interest rates next

The headline rate of seasonally adjusted unemployment fett by 36,500 m June to 1.6m, pushing the rate of unemployment down from 5.8 per cent to 5.7 per cent, according to the Office for National Statistics, Vacancies in June rose to 282,000, the highest level ever recorded. The ONS said yesterday that unemployment could soon hit the low est levels in 17 years.

The rapid fall in unemployment underlines the current buoyancy of the economy and could add to the pressure on the monetary committee of the Bank of England, the UK central bank, to raise base rates from their current level of 6.75 per cent at its next meeting in August 11 would be the forth consecutive monthly increase.

The June unemployment tevel was the lowest since April 1990, when it was 1.59m. If the trend commun., 11 could soon breach the previous record low of Lamin Sep-tember 1980. The decline in UK unemptoyment has been so rapid that it may endanger future EU regional and to the UK, according to the Alliance for Regional Aid, a pres sure group for local authorities. Mr Stephen Fotherell co-ordinator of the ARA, said: "Our current funding -£1bn (\$1.67bn) a year for 1994-99 - is now seriously under threat because government figures understate the reat extent of unemployment."

Other economists took comfort from the smalt fall in average carnings, which declined from 4.5 per cem in April to 4.25 per cent in May.

Other data out yesterday included the public sector borrowing requirement for June at £4.8bn, compared with Wolfgang Munchou £3.8bn in June 1!96.

■ NORTHERN IRELAND TALKS

Sinn Féin contacts cause walk out

Mr David Trimble, leader of the pro-Bruish Ulster Uniooist party, is to seek an urgent meeting with Mr Tony Blair, the prime minister, after the smaller unionist parties walked out of yesterday's session of the Northern ircland talks, angry at the government's renewed contacts with Sinn Fein, the Irish Republican Army's political wing. Both the hardline Democratic Unionist party and Mr Bob McCartney, the independent unionist, walked out of the session. The British and trish governments last month issued a joint paper outlining its arms proposals which envisages that terrorists would hard over arms in line with progress in the talks. John Murray Brown

■ PROPORTIONAL REPRESENTATION

System to be adopted in Euro poll

Britain is almost certain to adopt proportional representa tioo for the first time in 1999, with Mr Tony Binir, the prime minister, giving the go-ahead to plans to hold elections to the European Parliament under the system. The decision is expected to be ratified by the cabinet today. The prime minister's office sald vesterday that while difficulties remained in meeting the deadline. Mr Blair was now prepared to introduce legislation in the autumn enabling the change.

The move ends a long period of uncertainty, in which advocates of PR, led by Mr Robin Cook, foreign secretary, had been in a minority in cabinel. "What people shouldn't do is imagine this says anything about PR for Westminster, because it doesn't," an official said. John Kampfner

■ FISHING QUOTAS

Spanish begin compensation claim

Spanish fishing trawler owners yesterday began a multi-million pound compensation claim in their court action against the UK government for being excluded from fishing in British waters. The Spanish fleet was banned in 1988 from registering in the UK to take advantage of the British oational quota under the Common Fisheries Policy. In 1991, the ban was declared illegal by the European Court of Justice.

Mr David Vaughan, for the trawier owners, said the British government acted from political motives when it imposed the ban in spite of European Commission advice that the measure was unlawful. John Mason

DRINKS INDUSTRY

Code for alcoholic fruit drinks

Alcopops which breach regulations are to be "squeezed out of the market", the government will announce today, with the drinks industry's own voluntary watchdog launching a tough new code of practice. Shops and pubs will be urged to boycott alcoholic fruit drinks explicitly targeted at youngsters, with retailers who fail to respond potentially losing their licences.

Following the revamped code of conduct from the Portman group, the drinks manufacturers' regulator, the government's package stops short of an ootright ban, but atcopop makers will be forced to submit new products for pre-launch vetting. David Blackwell

■ WATER INDUSTRY

Leakage rates decline by 3\%

The privatised water companies this year reduced their leakage rates by an average of 3 per cent, according to figures released yesterday by Ofwal, the industry regulator. But Ofwat warned that companies had to make further progress. It also said it would investigate whether some companies overstated water consumption to make their performance oo teakage appear better. The average amount of water leaked by the industry fell 9 per cept to 1.502Mt per day. Ofwat said this represented about 27 per cent of total consumption, compared with 30 per cent last Michoel Peel

Ministers end row over who controls funds

By David Wighton and John Kampfner

Mrs Margaret Beckett the chief industry minister, has fought off a determined bid by Mr John Prescott, the deputy prime minister, to wrest away control of

inward investment. After a bitter turf war the Britain Bureau, the governprime minister's office has thrown its weight behind Mrs Beckett, who insisted tbat responsibility must remain with the Department

of Trade and industry. The decision is a setback for Mr Prescott, who argued that the regional selective assistance budget, which subsidises inward investment, should be administered by his proposed network of regional development agencies.

A senior government official yesterday said: "The DTI

selective assistance and will

Control of money from the European Regional Development Fund will also remain with the DII, although the agencies could act as the channel through which the funds are distributed.

A report from the Invest in ment's investment promotion agency, shows that for-eign direct investment in the UK soared 24 per cent last year to a record £9,34bn (\$15.59bn). Britain benefited headed by plans from LG of £1.7bn electronics complex in South Wales. The UK also saw a spate of expansion schemes from companies already established bere, notably US, Japanese and

German groups. . US companies accounted

Caspar Henderson on meeting Europe's proposed stiff targets for renewable energy

Tall order for energy

enewable accounts for just 6 per cent of the European but a forthcoming EU white industry leads in coeting and paper may set a target of as high as 12 per cent by 2010. Can Europe's suppliers of renewable technology rise to the challenge?

The target sounds ambitious but, according to the European Union Renewables Energy Centres (Eurec) agency*, EU member states already bold advantages in many important technologies.

For example, more than threequarters of the world's manufacturers of medium-sized and large wind turbines are European. German and Danish companies have achieved annual growth rates in sales of 50 per cent in recent years, while in Britain wind power is already delivered to the grid at competitive prices.

EU countries dominate the world market for small bydro equipment, with more than 80 per cent of worldwide sales for contracts greater than 1MW in recent years. In solar energy, the EU accounts for about one-third of world-wide photovoltaic (PV) module production and use, says the agency. Moreover, Europe bas taken a leading position in photovoltaics integrated into buildings, with several thousand rooftop and facade systems from Finland to Spain, Europe also leads in applications of PV for

developing countries.

energy most worldwide, leading the next generation of such stations with the Plataforma Solar de Almeria Union's energy supply, in Spain. The European glass windows technology. The European market for solar thermal domestic bot water systems is estimated to be Ecu500m (\$560m)

> Leaders in several of the biomass conversion technologies are also found in European countries. Gasification is most advanced in Sweden and other Scandinavian countries, while Denmark is pioneering biogas prodoction. European research and development on energy crops for electricity, heat and liquid fuels is also in a leading position. Riomass is likely to make the single largest contribution to renewable energy generation.

> European research and development, much of it in Britain, has established e lead in the field of marine energy, says Eurec. Weve energy and marine current energy show the most promise. with Britain's International Centre for Island Technology, National Engineering Laboratory, Powerstream, Seacore and Scottish Nuclear among the leaders. The potential is enormous, says Eurec, but these remain the most immature of renewables technologies, and commercial realisation is likely to be at least 20 years off.

The variability of output is not Know-bow on solar thermal a significant technical drawback power stations is among the fore- for most grid-connected applica-

tions except PV, says Micbael Grubb, an energy specialist at the Royal Institute for International Affairs, "Seasonal correlation between electricity demand and the availability of wind. wave and bydro power in most of Europe increases their value reletive to equivalent constant out-

put," he says. Furthermore, he observes, the development of better technologies for monitoring, control, load management and small-scale storage open the possibility of realising such potential benefits through "distributed resource"

electricity systems. Eurec's optimism was shared

by many particlpants et the World Sustainable Energy Trade Fair, held in Amsterdam at the end of Mey. Waste-to-energy power generation projects, which were not included in the agency assessments, were also hailed by speakers as an important transitional technology. The poor image these bave had is no longer deserved, says Richard Sandbrook, of the International Institute for Environment and Development.

But some observers challenge the notion that Europe is in the lead. The race to commercialise photovoltaics is dominated by Japanese and US companies, says

Paul Diamond, a co-organiser of the trade fair. A photovoltaic power station in Crete, which will be the world's largest if it reaches a proposed capacity of 50MW, is being built by the US company Enron, he notes.

Mark Woodall, director of Impax Capital, a venture capital and consultancy firm specialising in renewables, says many existing technologies already have the potential for profitable exploitation. The problem, he saye, is that most companies developing them are underfunded and undercapitalised.

Ignorance of the potential of renewables is most to blame for this, says Woodall, but renewables "will go through a fundamental step change in the next year or 18 months". With growing demand from consumers and increasing pressure for a level playing field with subsidised fosstl fuels, he thinks the provision of debt and equity capital to the renewables sector is bound to grow, and \$750m worth of projects in the near and medium term would not be unrealistic.

For longer-term market success, the agency says an integrated Eculbn (£660m) research programme is essantial. The effects from euch a programme could be substantial. Energy for Sustainable Development, a conauitancy which carried out 8 study for the European Commission called Teres 2, identified Ecu190bn of private and public investment that could be stimulated in the European renewable energy market by 2020 as a result of a "best practice" strategy for research, development and

A companion article, on Europe's policy options for renewable energy, appeared on June 4.

Antibiotics cut risk of heart disease A common antibiotic cut the

risk of recurring heart disease in a small group of heart-attack survivors with high levels of antibodies to a germ which causes flu-like symptoms and pneumonia, writes Marjorie

The group were part of a study that adds to growing evidence that an infectious agent may contribute to heart attacks and strokes. If so, autibiotics could be used in treatment.

Previous studies have found high levels of antibodies to the hacteria Chlamydia pneumoniae in diseased coronary arteries. Antibodies indicate that the bug has been present, and some scientists believe the infection may set off chronic inflammation, leading

to blood clots. The study, by St George's Hospital Medical School, London, funded by the British Heart Foundation, is the first to easure antibodies to the bacteria in beart-attack survivors and to monitor patients who took antibiotics.

Patients with the highest antibody levels had a four-times higher risk of heart disease than patients with no antibodies.

Azithromycin, an antibiotic, almost eliminated the additional risk to men with high antibody levels who took the drug, the study of 213 men found, according to Circulation an American Heart Association ournal.

Spielberg's plotless monster

eternal recurrence, Hollywood would call it surefire box office. Sixty years after King Kong, movie man still labours under a compulsion to bring very big monsters to large towns, while movie woman labours under the responsibility to scream, wave her arms about and be picked up in the air.

Steven Spielberg's The Lost World is so lost that it has more inchoate energy, if less shape, tban Jurassic Park. We know that logic is out to lunch from the first scene. "Beautiful day!" says the father of an English seagoing family picnicking on a gusty Pacific beach under a grey sky, shortly before his daughter encounters a deadly nest of rep-tilian throwbacks. And Nature is countermanded no less blithely in later jungle scenes, where giant Redwoods seem myeteriously to have stomped over from California.

With the folly, though, we get the ferocity: The Lost World knows that its mission is to spend 129 minutes jumping out at us and saying "Boo!". The first film's dinosaurs behaved with the orderly self-admiration of elinky, long-necked Brachiosaurus, there the spike-maned, lolloping Stegosaurus: the Elle and Naomi Campbell of evolutionary primetime. Only the T Rex and 'raptors offered serious violence.

In the sequel, shot largely at night by Janusz Kaminski (Schindler's List), Jeff Goldblum's returning chaos theorist is decanted by fate and Lord Richard Attenborough into a neighbour atoll where almost every animal is loose and lethal. This Costa Rican refuge used to function as Lord A's genetic engineering backroom until an unforeseen burricane. (How many foresee a burricane off Central America?) Goldblum comes to yon'll be back in five or six

THE LOST WORLD: JURASSIC PARK Steven Spielberg

> REMEMBER ME? Nick Hurran

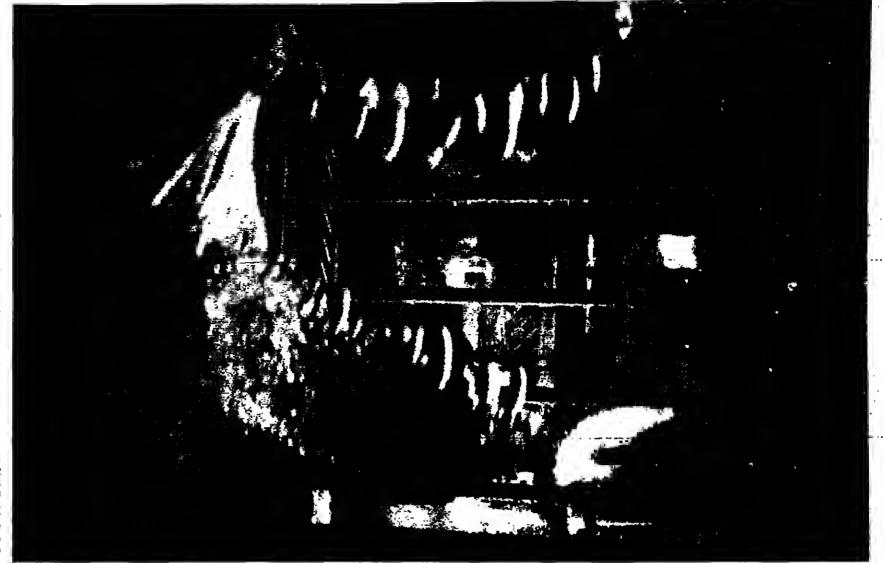

THE BUTTERFLY Fernando Colomo

LADY AND THE TRAMP Hamilton Luske, Clyde Geronomi, Wilfred Jackson

rescue his palaeontologist girlfriend, played by a screaming Julianne Moore. He stays to fight ravening digital or animatronic beasts while reading the riot act to the big-game hunters, led by Attenborough's hissable nephew (Arliss Howard), who want to gather a T Rex for the San Diego

Like most sequels, The Lost World has no plot. It is a free-association riff on the previous film's plot. There must be an endangered child (Vanessa Lee Chester as Goldblum's half-black deughter from some undocumented PC liaison). There must be a perilous safari, this time across the island's interior through velociraptor territory towards The Only Radio. And there must be a villain who runs into the woods to meet a fate worse than, but certainly incorporating, death. He is Peter Stormare, of Forgo and Bergman's stage Hamlet, impersonating a big-game bunter overrun by compsognathi (to you and me, piranhas on legs).

There must, above all, be dialogue you can wrap up and take away, piping bot, like fast food. "I'll be back in five or six days," bleats Moore to Goldbium. "No,

Folly and ferocity: a dinosaur on the prowl in "The Lost World: Jurassic Park"

masterfully mannered form throughout, Did Splelberg cast him because be looks like a primeval predator? The bulbous flerce-focused eyes, the jagged teeth, the reptilian skin make him a match for any of the animals, who in turn are a match for anything you can imagine.

They lope vastly through clearings. They thrash and roar like earth-moving machinery. Best of all, the slyest of them slither invisibly through tall fields, their passage marked only by borrible moving shadowlines as they converge on the little buman pilgrimage in centre screen.

There is inanity in The Lost World, but moments of genius, too. One scene is pure Spielberg, e borripilating use of the everyday. A character tumbles on to

pleces," says Goldblum, who is in hanging over a tall cliff. She can only lie flat while the fissuring glass spreads its web of disaster slowly around her. The darting motion and fizzing sound of each new crack may be the most inventive, literally shivery piece of film-making Spielberg has given us since Jaws.

None of the big animal scenes match it, least of all the desultory climax in San-Diego. Couldn't the creature have found something more exciting to do than lope down Main Street like a bored sailor on shore leave? Then it is back to the islands for a brief, promising premonition of Jurassic Park 3. Pterodactyls. Remember where you read It

Remember Me? is the week's second dinosaur movie. This time the window of an upended traffer the entire Michael Frayn-scripted

film deserves a cumbersome Latin name, to accord with a plot which attempts to bring Plautus to West Bylleet. This comedy of errors involves Jamie (Robert Lindsay), a flasb, Rolls-driving semi-stranger who drops in on "old flame" Lorna (Imelda Staunton) and her jobless husband lan (Rik Mayall) with, as they say in publicity bandouts, hilarious con-

As in all farces - and Frayn nas written some good ones - the setting must fill up with incongruous characters joined by common disaster. So we have a bornpractising son, a pertly pretty daughter, a black boyfriend, a pair of hired killers and a middleaged in-law couple who drop by for an afternoon nap en route to their boating holiday. (Do you know any couples who do that?). The plot accumulates but does

not build. Since none of the illmatched parties has any credible business in each other's lives, the bouse becomes like a railway terminus where everyone has been forced to say "Hello" to each other instead of boarding respective trains. By the time the Rolls had been stolen, the garage door smashed, the windows shot out and dear Brenda Secrets And Lies Blethyn, playing one of the drop-by snoozers, bad fled yelping into the sunset, I was mentally composing my Monday

Then came Tuesday. The Butterfly Effect is an Anglo-Spanish comedy about neighbours, inlaws and bi-national lovers messing up their lives in a Camberwell housing estate. Once more unto the communication breakdowns, the unexpected knocks at

afternoon shopping list.

the door and trouserless chaps hiding from discovery. All the stuff of classic farce, done with unclassical ineptitude. Here, too, is James Fleet, who played the male drop-by spoozer in Remember Me?, giving us his giraffe-necked silly ass all over again, this time partly in Spanish. Nietzsche would call it eternal recurrence. Anyone else would call it the summer silly season.

Lody And The Tramp at least goes about its business with style, though business in the usual dog sense is the last thing the four-pawed lovers do here. Show Disney a lamp-post and it would quarantine it with hearts and flowers. There are a lot of songs, a lot of schmaltz, some funny supporting characters (manic Beaver, those Siamese cats) and goodwill all around.

Opera / Stephen Pettitt

Character study after Britten

L htty College of Music'e Opera Group does not lack. The meat of their oceanic end-of-year double blll, resourcefully directed by Stephen Langridge in the epartan surroundings of Spitalfields Market Opera, was a new opera by Diana Burrell, based on Susan Hill's

short story The Albatross. Burrell's piece takes several cues from the dominating shadow of Britten. Not least, it is a tale of an outsider in a fishing village, the simpleton Duncan Pike, who is dominated by his wheel-There's the obligatory group of children, sweet at their games, sour at their taunts. A fisherman, Ted Flint, is no but a generous and strapping young sort, a goldenhaired hero (promisingly to dominate, still tormented sung by Julian Smith) who

mbitlon is evidently He and the strange prams festation. The outer person with Vaughan Williams' 1932 something that Trinspushing bag lady Beattie is portrayed by the approprious one-acter. Riders to the Sza. only people in the fishing village who show Duncan any understanding, sympatby or encouragement. Everybody else reviles and teases him. After Ted's death Duncan rebels, struggling with himself to make decisions, and finally gives his mother an overdose and sets

fire to their house. Burrell's music poses a severe technical challenge, often too much for Trinity College's valiant instrumental ensemble, here conducted by Christopher Fifield. Since her imaginative instrumental writing carries so much of the work's weight, that is a crucial problem. Ingeniously, the role of Duncan is cast for two singers. One -Stephen Brown - functions as the inner voice struggling yet without the physical timidity of his bodily mani-

(Siobban Mooney) are the ately small-voiced James Geer, who sustains well the clumsiness of Duncan's gestures, inviting our sympathy without transgressing the thin line that divides characterisation from caricature. There are some superbly

drawn character roles; Amanda Palmer is particularly impressive in the explosive, hysterical coloratura of Hilda as sbe shrieks ber command for ber son to cut his toenails. But, as a whole, the opera seems to have too much a sense of recitative again with more than a hint of Britten - and not enough sense of aria. Perhaps Burrell has translated the story into its new form too literally. Yet Burrell manages successfully to penetrate the mind of the poor, frustrated boy, a signal achievement that bodes well for her future music-theatre pieces.

The evening had begun

based on J.M. Synge's tale of Irish peasantry. The menfolk in the lives of two daughters and their mother have all. save one, died in the foaming briny, and this is the tale of bow the last of them. Bar tley, meets his watery end. The music, eloquently given under the direction of Anne Manson, sometimes recalls Pelleas et Melisande, though without the scope, or flexibility of phrasing and har-

mony, of that work. To be honest, it is rather dull. But it was ably sung with Cora Newman as Maurya showing a buge and rich contralto-come-mezzo in the making and Julie Leyland and Julie Partridge as ber daughters projecting radiant, though still small, soprano voices. The acting was not as good, but once everyone has wrung their hands and wailed, what else is there left for them to do?

n 1990, the original production of Stephen Soud beim and John Weidman's Assassins played in a New York theatre which sexted about 150 people. The reduction in scale to fit it Hampstead, while appreciable, is therefore not entirely In fact, Sam Buntrock's

production for New Light Theatre Company is more than respectable all round, with a cast including the fine Peter Straker and a couple of actors (Garth Bardsley and Fiona Dunn) from the British regional premiere of the show in Derby, as well as Paul Keating, last seen in *Tommy.*

The atmosphere on stage is generally intimate rather than cramped, and Caroline Humphris' pared down keyboard and percuseion arrangements (occasionally augmented by the trumpet playing of Stephen Watts as the Proprietor) never seem insufficient. Presumably Andrew Newey se John Hinckley Jr cannot actually play guitar, as the lead

instrumental voice in the

Theatre / Ian Shuttleworth Intimate

Assassins

Love" is once again supplied by Humphris with an acoustic-guitar sound on her synthesiser. Nevertheless, the number remains a terrific subversion of romantic-duet conventions, as Hinckley and "Squeaky" Fromme (Dunn), the failed assassins of Presidents Reagan and Ford respectively, sing their bearts ont to pictures of

their beloveds, Jodie Foster and Charles Manson. The show's bigb points remain in fine fettle: Sharon Eckman gets the lionesses share of the laughs as Sara Jane Moore, the apple-pic mom who also had a pop at Ford, although Dunn's manie jabbering makes a particularly strong double act with ber. Straker's Charles Guitean - grander

and more flourishing than 1

song "Unworthy of Your have ever seen the character - ascends the theatre's central aisie to the scaffold after disposing of President Garfield: his show-stopping number is exaggerated by numerous handshakes with andience members as he thanks them for "coming to my hanging

It seems a little strange to have inserted the additional number, "Something Just Broke", at the opening of the show rather than in the Oswald-Kennedy sequence but the hiccup this generates in pacing is soon forgotten.

I was one of the minority of critics not especially impressed by Keating's performance as Tommy last year, and his portrayal of the Balladeer contains simiexcellent singing voice, but (0171-794 0022).

his characterisation once again inclines towards truculence, and his acting technique is at yet only partly formed - at present, when he wishes to eeem to be doing less, he simply does entiate much between his main role as the Proprietor and his cameos as Presidenis McKinley and Ford. These, however, are flaws in the production rather than outright failures. Each successive production of Assassins continues to demonstrate just how mistaken was the original poor opinion of it as a musical por trait of the dark side of the

American Dream. One thing puzzled me. The caricatures of the presidents who constituted the assassins' real and intended victims. The group included Bill Clinton. Does the company know something we do not? Surely that would be taking a publicity stunt a little too far ...

New End Theatre, London NW3, until August 2.

Departure from ERM

September 10 1992

The rollercoaster pound

Maastricht conditions is

1914 gold standard, com-

early as it has been The Emu side of the equation has changed even more. The original model was to provide participating countries with a Bundesbank on a larger scale. An unwritten part of the understanding was that Emu would start on a limited scale with France, Germany and those countries traditionally linked to the latter.

Two events have signalled the underlying change. The first was the attempt by the German finance minister Theo Waigel - he of the "3.0 per cent means 3.0 per cent and nothing more" - to make a cosmetic reduction in the German budget deficit by revaluing the gold reserves of the Bundesbank. This attempt has failed. But the lasting impression remains that the German government, so far from being the strict guardian of the Maastricht conditions, is now as willing to apply cosmetic surgery as any other government. The spring 1998 conference to salact founder members of Emu may well have to go by forecasts, despite all the earlier emphasis on results.

The second hig change was the victory of an unreconstructed tax-and-spend Socialist party in the French parliamentary elections, But the new government continues to insist that it will join Emn at the start of 1999.

A consequence of German and French budgetary cosmetics is that there will be no excuse for keeping out southern applicants, if by hook or by crook they manage to bring their budget deficits to within bailing distance of the magic 3 per

The British government is unlikely to join in this parliament and most Scandinamean one that is lower vian countries will probably against non-European curstay out too. So we are faced rencies such as the dollar or with the prospect of a centhe yen. There may even be tral and southern European a case for such a one-off Emu with strings to Ireland depreciation to facilitate the and possibly Finland. This adjustment in real wages is what German public opinrequired to price European workers back into jobs.

A truly weak euro would mean one that was weak and unstable in terms of internal purchasing power ~ one which like the pound and the franc in the 1960s limped along from crisis to crisis. This would be a defeat for the whole ven-ture. One possibility is that, faced with this prospect, Germany will just draw back, despite Helmut Kohl's

promptings. Does it matter that the euro might either not take off at all or be so weak as not to be worth joining? It does. Quite apart from the political setback that a European monetary failure would hring, the present lurches in exchange rates are damaging. As any Britnow symbolic. If founder ish exporter will confirm.

stable domestic monsy is

Trade-weighted Index

already indicated that it agreed and not unduly not the only goal A sudden positively wants them as harsh fiscal objective at the fall in the sterling/D-Mark outset, are we not all too exchange rate of over 20 per likely to see a weak euro? cent, when Britain left the before deciding whether to By a weak euro I do not exchange rate mechanism of join. My idea is that Britain the European Monetary System, followed by an even larger upward swing five years later, whose extent or duration is still in the lap of the gods, hardly creates an environment for the long-term investment about which the new British gov-

ernment speaks so much.

Nor of course do these vio-

lent exchange rate move-

ments reflect changes in costs or other fundamentals. But experience first of shadowing tha D-Mark and then with msmbership of the exchange rate mechanism strongly suggest that in today's conditions ths only way of stopping violent currency fluctuations is to abolish separate currencies This is a prospect which Emu, if it can be revived,

offers for over half the trade

of member countries. Would not the prospect be transformed, however, if the British government surprised everyone hy at the last moment agreeing to be a founder member? This would alter the whole likely shape, More Scandinavian countries would probably follow. Under a British lead the European Monstary Institute could be left to determine with less emphasis on the budget deficit dogma whether countries further south had sustainahle positions. And that would include not only Italy and Spain, but also France, Above all the prospect of British memhership would

eliminate the desperate urgency of achieving the 1999 deadline. The importance of that deadline lies in the need to achieve Emu before Chancellor Kohl who is now its driving force - is replaced by someone less committed. But if the UK became a leader of the project it would not be so utterly dependent on one German leader. My sugges-

the present Blairite desire to let others launch the project would be a founder member after a referendum, but the exact dates would depend on reasonable conditions being fulfilled.

Such conditions could not reasonably cover an equalisation of unemployment rates, which depend so much on domestic policies. But they should require that countries enter at something approaching equilibrium exchange rates, as have argued in A Cool Look ot the Euro (David Hume Institute, Edinhurgh). By this I mean that deficits or surpluses in the balance of payments should be sustainable without unemployment above that "natural" to the labour market of the country concerned.

But is not Emu primarily a Franco-German deal, making no sense without France? Maybe. The original deal also involved a French acceptance of an independent European central bank modelled on the Bundesbank with a low inflation target. My guess is that France will sattle for the original low inflation arrangement, although with

higher public spending. A more difficult objection is that a single currency would not do away with the sort of stresses that are reflected, for instance, in UK short-term rates of interest being nearly 4 percent age points ahove German ones. Indeed they would not. The stresses would become and local variations in a low European-wide rate of inflation set by the European Central Bank. This is just what happens in the US today if there is a property boom in California or a local slump in New England, But it does not require a United States of Europe to bring a similar result to the Old **BOOK REVIEW - Edward Mortimer**

THE LAST GOVERNOR - Chris Patten and the Handover of Hong Kong, by Jonathan Dimbleby Little Brown, £22.50, 461 pages

Honourable role in dishonourable story

has a house near Bath in the west of England. So does the Prince of Wales. So did Chris Patten until he lost his seat as MP for the city in the 1992

general election. Both the prince and the former cabinet minister have made the journalist their friend and confidant, allowing him to film them in "private" situations, and baring their souls in long, wide-

ranging interviews. This has been of great value to Mr Dimbleby. His televised interview with Prince Charles and accompasellers. Now he bids fair to ous attempt to represent or repeat the trick with Hong Kong's last British governor. As soon as Mr Patten's

appointment was announced in 1992. Mr Dimbleby persuaded him to grant virtu-Government House for himself and a camera crew. Mr Patten agreed "to discuss for the future record - his strategy and his tactics at every stage", stipulating only that what he said would be embargoed until after the handover of Hong Kong on June 30 1997.

The fruits of that arrangement are now being shown to the British public in a five-part television series, the third part of which will be shown tonight on BBCL But the accompanying book contains far more detail.

So much detail, indeed, that some readers may lose patience. To the outsider it remains baffling that such endless argument and so limited changes in the arrangements for a single election (that of the Hong

Jonathan Dim- any case, about to leave, ment cared about their bleby, one of All the really important views and was prepared to Britain's best decisions and agreements known televi- about the future of Hong on their behalf. Kong had been made before Mr Patten arrived. So why did the then prime minister, John Major, send a leading politician to do a job previously entrusted to civil servants and diplomats?

Essentially because, after the 1989 Tiananmen massacre, people in Hong Kong were getting nervous. in 1991, in the first partially direct elections in the colony, advocates of democracy and critics of Beijing won 17 of 18 directly elected seats. Britain was at risk of being denounced in Hong Kong and around the world for handing over free people to nying hiography were best communist rule with no seri-

> even ascertain their wishes. Mr Patten hoped, by creative interpretation of the previously agreed Basic Law, to bring into being a genuinely representative LegCo which could continue through the handovsr. In this he failed. The Beijing leaders were unimpressed by his ingenuity in construing the text, and infuriated by his willingness to act without their prior agreement.

> They on their side hoped, first to intimidate Mr Patten into withdrawing his proposals, later to persuade London to overrule or recall him. They too failed. The 1995 elections were held as he proposed, but China refused to recognise the LegCo eo created. It has now been replaced by a temporary appointed body, pending new elections to be held next year under rules on which Britain will have no say.

Was this outcome worth much passionate feeling all the fuss? Mr Dimbleby revolved around some rather concludes that it was. Mr dently intends. Patten salvaged Britain's honour in the closing Phase Kong Legislative Council, or story. He showed people in colonial power that was, in of Britain's roling establish-

argue seriously with China

More important, he established benchmarks of democracy, human rights and freedom of expression by which the new administration will be judged, and helped bolster the courage which people in Hong Kong will need for any serious attempt to keep it up to those benchmarks. I do not envy those people their task, hut I believe (and most of them seem to believe) that their chances are a bit better than they would have been without Mr Patten's efforts.

But then I, like Mr Dimbleby, am a friend of Chris Patten. Others, including most of the Hong Kong husiness elite and many in the UK who are professionally or commercially interested in China, believed Mr Patten was taking a terrible risk by annoying Beijing. Some even thought he was sacrificing tha interests of Hong Kong for the sake of a good press.

Mr Patten was wounded by such comments. His difficult job was made harder by knowing that businessmen and some officials were badmouthing him and trying to undermine his policies. He reacted privately with waspish remarks, often cruelly witty. Mr Dimbleby makes many of these public, in a book he describes as "my own account of events and not 'authorised' by anyone", but which others will see as Mr Patien using a friendly journalist to settle scores revealing quite a few official secrets in the process.

The effect may not be as good for Mr Patten's reputation as Mr Dimhlehy evi-

German gloom may put current European upswing at risk

From Mr Nick Tyrrell. Sir, Peter Martin is in line with tha consensus when he ascribes the current surge in German exports to the weak D-Mark (Global investor: "In search of a miracle worker". July 14). But this story does not hold water: it does not explain why imports, too. have surged in Germany recently despite flat domestic demand. If the exchange rate were already beginning to have a marked effect on trade volumes (and this

Psychology of Italy joining Emu From Mr David Marsh,

Sir, When, and whether, economic and monetary union goes ahead will be decided not by economics. but by the three Ps - politics, psychology and practicalities, wherehy the latter refers to the problems of getting banks' euro-computer systems to work on time. So it pays to be wary of essments of Emu probabilities based purely on economic calculations. Financial markets may well be

anticipating a narrowing post-1999 interest rate gap etween Italy and Germany ("J.P. Morgan calculator," July 15). This tells us simply that financial market operators, for the moment, are betting that yield gaps between Italian and German bonds will fall further in the next two years.

It is greatly exa deduce from this that 'Italy's chances of joining the inaugural round of Emn in January 1999 have reached 75 per cent" (as stated in the article "Odds shorten on Italy joining front-runners in Emn stakes"). Italy's real chances of joining Emu in 1999 are surely much lower. The reason is simple, though it may be lamentable: the Germans are not inclined to share stewardship of their currency with a nation that they do not entirely trust In fact, your article con-

(

ji.

firms this by quoting Mr Avinash Persaud of J.P. Morgan as follows: "The more likely that Italy joins Emu. the more likely it is that Emu will be postponed."

If the "J.P. Morgan calculator" included some exotic calculation designed to take account of national psychology, it would more accurately indicate the likely outcome of the Emu saga I believe this denouement

will be exceptionally tortu-David Marsh, Robert Fleming & Co,

Unfair view of a changing industry

From Sir David Naish. Sir, Your editorial "Alas, John Peel" (July 10) misrepresented the position of UK farmers. You state in your article how agriculture is of declining strategic importance, that consumers and taxpayers still support farmers, and that the taxpayer covered the main costs of the BSE saga. Taken individually all these points are true, but taken together they paint an incorrect picture of a declining industry refusing to face up to a changing world, living off consumers

and taxpayers. The industry has been hugely successful since the Common Agricultural Policy began and much structural change has taken place within the industry. It has responded to every govern-

ment signal with astonishing But not to recognise the productivity gains. With the EU's negotiating position in the next World

Trade Organisation round in mind, the NFU has advocated a move to bring EU farmers closer to world markets and enable them to compete in a more liberalised trading environment. But the industry will continue to require transitional assistance, although we realise that this support may be reduced in time along with similar support payments in other countries as part of a multinational programme within future World Trade

Organisation trade rounds. With regard to the costs of the BSE saga, I recognise that the taxpayer has had to cover many costs; for this the industry is very grateful.

costs currently borne by British beef farmers is hugely unfair. The export ban on British beef remains in place, the farm-gate price for beef is still more than 20 per cent lower than before the BSE crisis began and many beef farmers today are struggling to remain afloat. Many heve already left the industry.

The NFU has taken an active and constructive part in the debate running up to the proposals to reform the CAP because we recognise the need for it.

Baint per dollar

FINANCIAL TIMES

Number One Snuthwark Bridge, London SE1 9HL Tel: +44 171-873 3000 Telex: 922186 Fax: +44 171-407 5700 Thursday July 17 1997

Hard pounding

traditionally strong currencies 1.67. Over the same period, boware weak and traditionally weak ones strong. But the managers of the US dollar, the Japanese yen and the D-Mark are happy with this turn of the great wheel of currency fortune. So long as their complacency lasts, those caught in the turnoil can do little more than grin and bear it. This is true for the emerging economies of eastern Europe and east Asia. It is just as true for the British.

The pound has appreciated by 38 per cent against the D-Mark from its low in May 1995 and by 32 per cent since last August alone. It is now well above its old DM 2.95 central rate in the exchange rate mechanism of the European Monetary System. British travellers abroad may love the appreciation, but exporters loath it.

Unfortunately for the British, Germans have become devaluation-lovers at last. Only vester day, e government spokesman declared that "the rise of the dollar and sterling against the mark is improving Germany's competitive position and will boost growth and jobs without creating inflationary dangers". So competitive devaluations are wonderful, after all.

Vantage point

From the UK's relatively narrow vantage point, the most important external development is indeed the weakness of the D-Mark. Against the US dollar, for example, the D-Mark bas depreciated by 24 per cent since its high point in April 1995 and by 18 per cent since last August alone. Yet the weakness of the D-Mark is not the best way to describe what has been happening. The striking feature is the strength of the US dollar against both the other two significant currencles. The yen, in particular, depreciated 37 per cent from April 1995 to April of this year, before rebounding.

Thus the strength of sterling can be broken down into its and its appreciation with the dollar against third currencles.

This is 6 time when against the dollar, from 1.54 to ever, It has appreciated by 32 per cent against the D-Mark.

Two questions arise: why are the European currencies so weak and why has sterling risen even more against them than the dollar, even though it is more vulnerable to European competition than the US?

To the first, there are two answers: the need of Europe's weak economies for a devaluation and the willingness of the anthorities to embrace it; and the consequent desire of investors to flee European curren-

To the second, there are also two answers: the habitual tendency for sterling to rise with the dollar when the dollar rises against the D-Mark; and the similar cyclical positions of the US and the UK, hut with the UK apparently rather closer to over hesting than the US.

Depressing conclusion

These rational explanations all have force. But they are not entirely persuasive. In particu-lar, the increases in short-term interest rate differentials between the dollar or pound and the D-Mark or yen have been far too small to explain more than a small fraction of the appreciation of either the US dollar or the pound. There must heve been e fundamental re-rating of these currencies, together with e speculative "bubble".

another way of saying that the reasons for such big exchangerate shifts are far from understood. That is also not the only depressing cooclusion. It is also clear that inflation convergence is not going to be enough to produce exchange-rate stability. Still more depressingly, the fact that these huge swings are in part bubbles does not mean the British authorities can prick them - et least on their own.

Unfortunately, this is just

The Germans, the Jepanese and the Americans appear content with what is happening. So long appreciation against the dollar as the first two want weak currencies and the Americans are willing to tolerate a strong one, Since last August, sterling has the British must live with their only appreciated by 8 per cent painful sterling dilemma.

Reforming the UN

Mr Koli Annan owes his \$1.6bn which the US owes the position es UN secretarygeneral to the US, which last year vetoed e second term for his predecessor. That gives him a certain strength, both in dealing with the US itself (which needs to show that its hostility to Mr Boutros-Ghali achieved something), and in dealing with other member states and the UN hureaucracy, which now know that without US support the UN is doomed to irrele-

Much, therefore, was expected of the reform package which he announced yesterdey. It turns out to be worthy, hut disappointingly modest.

Feced with flerce opposition from existing agencles, Mr Annan has retreated from the specific reform most touted in advance: the centralisation of all UN humanitarian activities under e single roof. He has had to content himself with giving his department of humanitarian affairs e co-ordinating role in emergency relief, while transferring its operational functions to other entities that provide services on the ground"

More imaginative is his plan to win third world support for the cost-cutting on which the US Congress insists, by earmarking some of the proceeds as a "development dividend".

1

10

But the package as a whole shows how far from reality is the popular US depiction of the secretary-general as e dangerously powerful figure, responsible for what is wrong with the UN and able to put it right. In each area the initiatives promised by Mr Annan on his own account are very limited compared to the measures wbicb "can be done with the support and approval of member states".

Legally obliged

In the past it was convenient for the US administration, and other governments, to exaggerate the power of the UN bureaucracy, in order to blame it, in such tragedies as Bosnia, for their own failure of will. So it is not surprising the administration now finds it hard to perenede Congress to pay the sion in time for the millennium.

UN in arrears, and has to infuriete other member states by setting conditions for payments it is legally obliged to make

At best, the Annan package will buy the US administration a short hreathing space from Congress. But the time gained may be very short. The peacekeeping budget, which the UN in recent years has habitually plundered to close gaps in the regular one, is rapidly shrinking as UN peacekeeping is wound down, being replaced by ad hoc forces from regional organisa-

Single agency

Whatever time there is must be used for serious talks between the UN's leading members (the G8, plus China and perhaps India) about UN reform in a more positive and far-reaching sense; how the organisation can be better equipped to manage the increasing number of problems (such as nuclear security, climate change, drugs and transpational crime) which can only be tackled globally.

Mr Annan's plan to put all UN funds and programmes with development operations in a single group is a step in the right direction but not radical enough. There should be a single egency for sustainable development, bringing together economic and environmental

Congress'e distrust of the UN, and indeed of international bodies in general, reflects e feeling that they do not reflect the reality of American power. Congress sees no reason why the US should tie itself down by pretending that other states, even those that are or aspire to be permanent members of the UN security council, are its equals.

Yet the US cannot escape the need for certain global issues to be managed multilaterally, especially given its eagerness to make others pay e larger share of the costs. President George Bush's "new world order" evaporated too quickly after the Gulf war. The US needs to rediscover an international sense of mis-

Asian tigers catch a virus

Asian economies: a bout of ill health

Currency turmoil unleashed by the flotation of the Thai baht need not spell the end of the economic miracle, says Peter Montagnon

Real GDP, annual % chance

to follow another in Asia these days. After last year's export slowdown came strains in the region's banks as they struggled to cope with an overheated property market. Now several countries have been hit by currency turmoil and higher interest rates which are likely to stunt growth for the second year in a row.

But in the midst of the storm comes consolation from a surprising quarter. Mr Paul Krugman, of the Massachusetts Institute of Technology, the US economist who startled the region two years ago hy forecasting an end to its traditionally high growth rates. says the upset is not the beginning of the end of the Asian mir-

Instead, he says the region's troubles, which have seen central banks abandon efforts to support the Thai baht and Philippine peso as well as intense pres on the Malaysian ringgit this month, are largely cyclical.

Last year's export slowdown came just as the hangover was beginning after several years of exuberant investment in the early to mid-1990s. "Booms like that in themselves bring on a crash," says Mr Krugman, who has coined e new word after the Thai currency - bahtulism - to

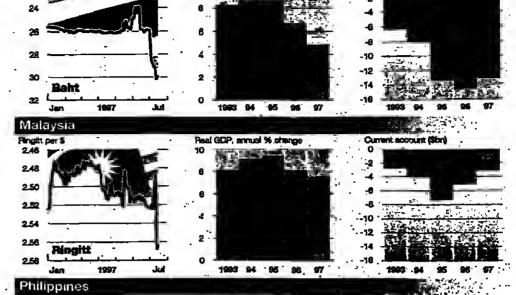

describe the current Asian virus. Still, the turmoil shows Asian economies are "not bullet proof" and their economic management has not been all it was cracked up to be, he edds. International economists sey Asian governments must learn to be more flexfble in dealing with global capital flows and increased competition.

On the surface, the case that Mr Krugman's depressing original scenario might he coming true looks begulling. His theory claims Asla's miracle was founded "more on perspiration than inspiration". Its traditional high growth rates are the product of more and more investment. and cheap labour rather than stepped up efficiency and produc-

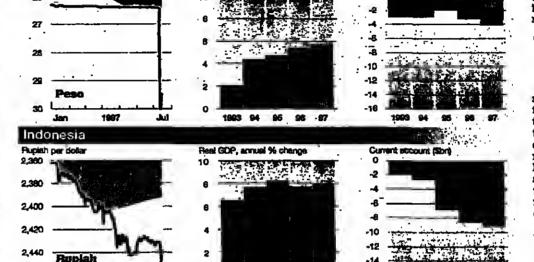

With last year's export slowdown, Asia appeared to be failing the challenge of boosting productivity and moving into more sophisticated manufacturing, Too little attention had been paid to the need to raise workers' skills, tco much capacity had been created in the investment boom and too much hard won savings had been dissipated in unhealthy property speculation

But Mr Krugman himself says there is only a weak connection between Asia's present turmoli and his theory of a limit to regional growth. The idea was never that growth would end with e bang across the region as e whole. Instead growth rates Its central bank has thus not would simply flatten out over a long period, he says. One of the dangers, stressed

repeatedly by regional experts, is that of generalisation. Thailand, many argue, is e special case. Its skills are weak hecause it neglected its education system for too long. Earlier this decade it embarked on e chaotic liberalisation of its financial sector. This clashed with its policy of linking its exchange rate to the dollar because e proliferation of poorly regulated financial institutions sumed it was safe to borrow at short term abroad. In the two years to 1996, foreign borrowing ter, is headed today, can help by hy Thai financial institutions

Real GDP, ennual % change

elmost doubled to \$77.4bn, (£46.3bn) according to the Bank for International Settlements. The totals for other countries

are smaller. Though borrowing by Philippine banks has been growing fast it is from a very small base and the total outstanding was only \$4.7bn at the national Monetary Fund. end of last year. Borrowing by Indonesian banks actually fell last year hy \$1.1bn to \$11hn.

Indonesia has also been spared the worst of the currency turmoll because it started as early as 1995 to widen the fluctuation bands for the ruplah against the dollar. been driven to support a rigid exchange rate against the weight of market forces.

Even Thailand, with a history of strong government finance, has the capacity to recover, says Professor Rudi Dornbusch, another MIT economist. Its goverument "could afford to go out and get drunk" hut it has managed its crisis poorly and must

now soher up, he says. The most urgent task is to deal quickly with the hurden of bad loans on its domestic hanking sector. Japan, where Mr Thanong Bidaya, Thailand'e finance minisand companies. As the country's largest foreign investor Japan has a natural interest in resolving the crisis, but its own record means it is poorly qualified to give advice on sound banking, says Prof Dornbusch wryly. That still requires belp from the Inter-

The letest difficulties aside overall the Asian picture is still one of positive fundamentals. This is not a Latin Americanstyle crisis. By and large Asian countries have strong fiscal positions and high savings rates. Most have manageable debt and growth is still higher than in Latin America.

"There is large room for these countries to grow," says Mr V.V. Desai, chief economist of the Asian Development Bank in Manila. There is no need for e crisis of confidence about Asian competitiveness But there are also inefficiencies

in Asian economies as a result of excess investment and "wrongheaded, over-rigid exchange rate policies". The environment in which Asian economies have to operate is changing, he

Governments can no tonger ter, is headed today, can help by insulate themselves from internation that the surge of investment in restructuring loans to Thai banks it is all flows. Many tried themselves from internation that the surge of investment in tional capital flows. Many tried

too hard to stick to rigid exchange-rate policies with a close link to the doller. That caused them first to stoke up the boom as domestic liquidity ballooned when capital flowed in during the mid-1990s. Then they could not cut their interest rates as the cycle turned for fear of accelerating outflows.

Current account (Stori)

Last year's yen weakness proved another disadvantage in sticking to the dollar. Though the Japanese currency has strength- Mr Chen. ened again in 1997, it is still not back to its original peaks. South-east Asian countries have lost relative edge against Japan.

There is a risk that some currencies may fall further, says Mr Berhard Eachweiler, regional economist of J.P. Morgan in Singepore. But that will not be because they are intrinsically overvalued. Rather it reflects their greater openness to capital flows. "What's key is for governments to acknowledge that they have to have some more policy

flexibility," he says. More controversial is the notion advanced by some economists, including Mr Michael Taylor of W.I. Carr in Hong Kong.

fecturing capacity which is weighing on the region as a whole. Many Asian countries are trying to export similar products. There may be some crowding ont, says Mr Krugman, but if South Korea built too many steel foundries then that has nothing to do with China. The same is true if Thailand over-invested in

property. China, which has been growing at a rate of almost 10 per cent e year has the scope to become a large market in its own right. adds Mr Desai. At present, though, China is hardly playing a locomotive role. While its own exports are recovering from last year's sharp slowdown, domestic demand is constrained by the losses et state enterprises and its sickly banking system.

The authorities are still too worried about inflation to relax credit further, argues Mr Hugh Peyman of Dresdner Kleinwort Benson in Singapore. Over 90 per cent of Chinese urban households have colour televisions and washing machines. Barring the advent of the two washing-machine family, the market for these consumer goods is saturated, he says, while fear of unemployment is sapping confidence in some

ut if China has disappointed as e market, it is still a formidable competitor for several Asian exporters, says Mr Desai. Its emergence will force them to step up their efforts to boost productivity and move their industries up-market. Nut only is China supplanting even relatively poor countries like Indonesia in hasic industries. such as textiles. The manufacture of inputs, like plastics, is moving there from more sophisticated economies such as Taiwan. Mr Chen Zhao, managing edi-

tor of the Montreal-based China Analyst, says weak demand in both China and Jepan heve added to the region's surplus capacity, "Asians have set up a whole lot of excess capacity, and then all of a sudden they feel constipated," he says.

Competition has brought e remarkable swing in export prices for Asia (excluding Japan). Whereas they were rising at a rate of 10 per cent at the end of 1995, by the end of last year they were falling at-an-annual rate of 4 per cent. The swing is partly the result of weak demand in industrial countries but it also reflects "massive supply side expansion in Asie", he says. Devaluation may not be a panacea, but the risk of not devaluing is to bring on a recession, says

At least there is a eilver lining. By allowing their currencies to fall, says Mr Chen, Asian countries are exporting deflation. Since the price of their products will remain low there will be less inflationary push in the industrial countries that consume them, and less pressure to raise interest rates.

As for Asia, it may take e couple of years for its economies to digest the excesses of the mid-90s. In a more competitive world they will need to be more nimble than ever before. The current downturn could even he healthy if it taught Asian governments of the need to manage their economies better, says Mr Desai, but "I only wish they had learned it et

· OBSERVER

Top-level scrutiny

God has found a new way of keeping tabs on Mammon. The Vatican, the headquarters of the Catholic Church, has been admitted as an observer to the World Trade Organisation, one of the pillars of the international economic order. The city-state enclave of Rome

got the nod yesterday after a hit of e tiff with India, which argued that the Vatican had no commercial interest and that, under WTO rules, countries become observers as a first step to eventual membership. The Vatican says it doesn't want full membership, which perhaps is just as well - a full-scale dispute with clerics over imports of candles and altar wine hardly bears thinking about.

India was placated by assurances that letting in the Vetican wouldn't set a precedent. That doesn't seem to accord with the view of Egypt, Bangladesh, Pakistan and Indonesia, which welcomed the decision and went on to ask the WTO to dust off long-shelved applications for observer status from the Islamic Conference, the Islamic Development Bank and the Organisation for African.

So why does the Vatican want. I The European Commission. in? Apostolic Nuncio in Geneva

■ Wired magazine - the original cyberhip paper publication for the nerd generation - is untangling its management. From now on, supremo, publisher and editor Louis Rossetto will leave business strategy to others and concentrate his considerable energy on "content" - the stuff that fills the non-paying pages. About time, some will say.

Wired's two aborted efforts at public share offerings, its unsuccessful TV efforts and its cooling HotWired unline ventures have raised questions about its management. Yet Wired has echleved worldwide recognition and developed a loyal following. With a few more besuited types et the top and . Rossetto steering the editorial: direction, it could yet reach higher voltages.

World wide wait ever anxious to harness the ink and paper to get Agenda 2000, yesterday's mega-report on hungry to the internet.

As every news organisation from Helsinki to Heraklion tried their digital retrieval skills, 6 huse queue built up to get into the Commission's website. The Commission's own office in Sloventa, one of the successful applicants, had to wait in line oriline with everyone else for four hours .

Estonians, Czechs, Poles and others whose admission to the the EU anteroom was confirmed. yesterday, will be hoping that their progress into the union is smoother than Agenda 2000's passage into the public domain:

Red letter days

Affredo "Dirty Harry" Lim, the hardnosed mayor of Mamile who earned his nickname as a no-nonsense police officer, is stirring up some trouble with his latest move against drug pushers. He's told police to paint "Beware A pusher lives here Go away" in hig red letters on the appropriate doors. At the latest count, 213 houses had been. daubed with the slogan. But now the Philippines top legal association and:

Commission of Hussan Rights

wheeze. The lawyers say it's based on and begins with the same methods of illegality and arbitrariness as Nazi Germany. Others express quieter concerns. "I'lds sort of thing is all very well," says a western diplomat. "But they're not going after the big fish, which include senior police officers. The people whose houses are being redecorated are just the small fry." Lim's not one to be deterred by strong words from lawyers or carping by foreigners - his . 'cleansing" of Manila's red light district several years ago

attracted similar protests. He's

pressing on with the paintwork.

■ Media tycoon Rupert Murdoch

Good citizen

has been visiting China where his plans to expand television services through Hong Kong-based Star TV are meeting resistance from the censorshipminded Chinese authorities. Zhu Romgii. China'e senior vice-premier in charge of the economy, in a good-humoured attempt to be helpful, reminded Australian-born Murdoch that he'd become an American citizen to satisfy US law regarding ownership of television stations. Now that he wanted to expand in China, Zhu suggested, his . next move was obvious.

lesser cost".

The Budget Of Japan Japan is becoming more and Japan is becoming more and more a factor to be recicioned with the trade, finance and policy of the world. We have even been told lately that an offensive altience has been chared into between Spain and Japan against the United States. The idea of such a strange combination making war upon the United States however, really too hizzore to however, really too hizarre to be taken seriously; but even the suggestion of such an Alliance is evidence of the growing importance of this Far Eastern State, which only a few years ago was a negligible quantity in international politics.

50 years ago

Mr Morrison On Industries

Mr Herbert Morrison, Lord President of the Council, eaking at a Printing and Kindred Trades Federation function, said he did not want to see Britain composed entirely of large scale maustries. He did not wish to see the individual crushed out. Whatever they were and whoever they were they should all remember they were working for John Bull and for the good of Britain. The best way to face up to post-war difficulties was to say: We are British and we are going to master them and get through to more orderly economic conditions.

US split as United Nations unveils reform proposals

By Bruce Clark in Washington

A reform plan for the United Nations, hilled by its authors as the biggest change in the organisation's 52-year history, was warmly greeted by the US administration yesterday, but dismissed by some members of Congress as too little, too late.

Mr Kofi Annan, the UN secretary general, presented a plan to trim the bureaucracy hy merging or eliminating seven divisions of the secretariat and transferring resources from paper-pushing to develop-

The plan identifies four key concerns for the world body peace and security: economic and social affairs; development; and bumanitarian affairs - and seeks to coordinate UN activities in each

not met its concerns.

strong US support, also called for the appointment of a deputy secretary-general and a cabinet-style administration. The number of posts at the level of under-secretary general, currently 27, would be slashed by a third.

Mr Bill Richardson, the US ambassador to the UN greeted the proposals as a "very significant step towards structural reform" which would make it possible "to do more for the world's people, do it better and do it for less"

But the office of Senator Jesse Helms, the chairman of the Senate foreign relations committee who has led calls for deep cuts in UN bureancracy, dismissed the plan as "incredibly modest" and "tinkering about the edges".

Senator Helms remained committed to a plan to pay off \$819m in US arrears to the UN mat who was appointed with and other organisations over

Kofl Annan: key concerns three years, subject to further

rapid progress on reform, a okesman for him said "Either Mr Annan has lost his nerve or he has lost a turf war," said the spokesman, Mr Marc Thiessen, who added that the modesty of yesterday's package would redouble the Senate's determination to

keep pressing for cuts. Mr Annan denounced his Congressional critics for trying to dictate terms to the 184 other member states. "These unilateral demands do not impress, they do not intimidate, in fact they offend," he said. In an apparent reference to

Mr Helms, Mr Annan said that his package would "not please those who are trying to gut the UN" hut they should be welcomed by those with a genuine interest in the organisation. Mr Annan said that even with the promised US pay-

ments, "we are not yet out of the woods" in solving the financial crisls - which is expected to get worse as a peace-keeping fund, often raided to meet routine expenses, steadily dries

"We strongly support the Commission on its position on Boe-The European Commission ing-McDonnell. It could be extremely dangerous for Europeans," Mr Rexrodt said the 20-year exclusive contracts remained a problem. It is still possible that Boe-

ing will produce a last-minute tic states, alteration to the deal ahead of In a 1,3 In a 1,300-page report named next Wednesday's meeting, Another possibility is that Boeing will pre-empt the Commission's decision hy withdrawing its notification of the merger. It would then have to

re-submit a modified deal which took account of the Commission's concerns. Industry observers say there would be little point, bowever, in Boeing rs-submitting Its merger proposal as the two sides have run out of compromises that would make the

deal acceptable.

By Lionel Barber and Nei Buckley in Strasbourg

yesterday revealed a blueprint for uniting western and eastern Europe, creating a European Union of almost 500m people stretching from Barcelong to Bucharest and the Bal-

Agenda 2000, the Commission called for radical reforms to the Common Agricultural Policy, tighter rules on aid to poorer regions and a further constitutional conference to prepare for a union of more than 20 member states.

It told the 10 aspiring candibloc that none currently meets the economic criteria for membership. But five countries the Czech Republic, Estonia, Hungary, Poland and Slovenia should do so soon.

to begin next year under the British presidency.

The French government criticised the CAP reform plans. Britain opposed plans to maintain special "cohesion" funds to countries which join economic and monetary union in 1999, an implicit warning to aspiring Emu members Ireland, Spain and Portugal.

Some governments, notably Denmark, are also uneasy about the recommendation to restrict the first wave of prospective entrants to the favoured five central Europeans, plus Cyprus.

Lithuania complained that the judgment lacked objectivdates from the former Soviet ity, while Romania said the EU was wrong to proceed with expansion in waves, along the lines of the Nato military alliance, which agreed last week to admit the Czechs, Poles and Hungarians.

Bulgaria and due to vote on the merger on versy among EU governments failed to make the Commis-July 25 - two days after the and disappointed candidate sion's short-list on economic the second world war. political grounds because of its human rights record.

Mr Jacques Santer, president of the European Commission, speaking to the European Parliament in Strasbourg, urged EU governments to seize an historic opportunity to unite the continent for the first time in 500 years, "This is not a process of excluding other countries. It is a process of inclusion which will be pursued permanently."

Agenda 2000 proposes tight hudget management, holding EU spending until 2006 to 1.27 per cent of EU GDP, the level expected to be reached in 1999. Within this sum, the Commission proposes spending Ecu275bn (\$302bn) on regional

Ahout Ecu45hn (\$49bn) should go to the eastern applicants - a sum which Mr Santer likened to the 1947 Marshall Plan which the US tion of western Europe after

No turning back, Page 3

Exuberant equities

THE LEX COLUMN

The Dow Jones industrial average burst through 8,000 yesterday - a neat 25 per cent above the level at which Mr Alan Greenspan famously sounded the alarm about the market's "irrational exuberance". But it was hardly alone: the UK market stormed to a new record, as did Germany and France. You did not have to search hard for explanations. Consumer inflation at a 30year low in the US was a powerful reminder of the goldlocks recovery which has driven Wall Street. Similarly, the dollar hovering around DM1.80, with Germany clucking its disapproval, reminded how weak

pean equity markets. Buoyant global liquidity has also played a part. Low interest rates have forced even cautious European investors to desert low-yielding cash and bonds for shares. This effect is underlined by the extent to which large stocks have outperformed smaller ones - by 15-20 per cent over the past year in most big markets. Retail investors prefer bigname stocks, as do institutional investors with large eums to invest.

currencies have helped power Euro-

All jolly exuberant. But what of valuations? On a price/cash earnings basis, figures from Morgan Stanley show the US market to be 51 per cent overvalued compared with its 10-year average. On a price/ earnings basis it is 56 per cent overvalued. The picture in Europe is little different.

History, of course, is not a definitive guide to the future, And there is a case for richer valuations; sustained low inflation has made corporate earnings more predictable. This has pushed down the risk premium investors require to hold equities rather than bonds. If future cash flows are discounted at a lower rate, this makes them more valuable, allowing prices to rise further. But at these levels, whatever

upside remains is dwarfed by potential losses. Of course, the fact that markets are expensive is not a sufficient reason for them to fall. And no catalyst for a correction is at hand. Still, the laws of physics have not been repealed. When the correction comes, the double whammy of benign fundamentals and falling risk premiums works just as effectively in reverse.

most committed conglomerates is divid- adviser, accused BZW of "very un-

ing into three for the second time in less than two years. Of course, there is nothing like the zeal of the convert, especially under threat from a hostile bidder like Hilton. And the logic of keeping hotels and casinos, telephone directories and educational services under one roof

was always questionable. But much of yesterday'a 8 per cent jump in the share price can be put down to FTT's intention to buy back a quarter of its shares, as well as management's discovery of another \$15m of costs to cut, rather than the demerger proposals. Indeed, the first three-way split into insurance, industrials and the present leisure grouping - did not unlock any hidden jewels. The combined share price of ITT's three parts has risen 68 per cent since the group announced its first demerger in June 1995. That is less than the US market'a 75 per cent rise, despite a substantial hoost from Hilton's

recent bid and yesterday's jump. Unsurprisingly, ITT's plans will make life more difficult for Hilton, Spinning out the hotels and casino business - the bit in which Hilton is interested - on a tax-free basis will make it almost impossible to take over later without incurring a huge tax bill. Second, this business will have a staggered board, making it more difficult to eject incumbent directors. Most worrying of all. shareholders will not even get a vote on the demerger.

Formula One

Salomon Brothers' about-turn on ITT is turning into a stock mar- BZW's role in Formula One Holdket amoeba. What was, until ings' flotation is astounding. Only

ened to remove it from the FOH flotation syndicate. Salomon's original remarks were intemperate. Still. it is puzzling why the US investment bank has had to backtrack so

comprehensively.
In touting FOH shares to British Sky Broadcasting, BZW was stretching its role as a member of the flotation syndicate. Given that BZW is a BSkyB adviser, doing so potentially involved a conflict of interest - unless, that is, FOH had authorised the approach.

The question of whether there is any merit in an equity link between BSkyB and FOH remains. FOH certainly has an interest in cutting o deal with BSkyB to distribute tts programmes in the UK, as it has with other pay-television operators like France'e Canal Plus. But is there any extra advontage in

BSkyB huying a stake? One possible explanation is that BSkyB might be prepared to pay top dollar for FOH sharee in exchange for a cut-price programme supply deal. The price BSkyB paid could then be used as a benchmark for what other shareholders would put up - belping relaunch FOH's stalled flotation. But would such a scheme really fly? Outside investors would presumably not be so naive as to think that, if BSkyB received a sweetheart deal, they should be paying the same premium price.

Raisio

Forget drugs; try magic margarine. Shares in Raisio have soared 53 per cent in two days after It signed a marketing agreement with Johnson & Johnson, which will allow the Finnish group's choiceterol-lowering margarine to be mar-keted in the US. This is biotechnology with the bio taken out, Raisio's fat-fighting Benecol marge addresses a huge market -Americans alone spend \$33bn a year on slimming products. But, unlike drugs, it is easy to produce, needs only limited regulatory approval and can be sold without prescription. Raislo's biggest problem so far has heen securing enough raw material, even though Benecol is only being sold in Finland as yet. Analysts hazard that a multiple of 50 times this year's earnings could drop to less than 10 times by 1999. Maybe it is not too late to place a spread bet.

Deal adds 18% more to Raisio shares

By Greg McIvor in Stockholm

Shares in Raisio surged again yesierday, adding another 18 per cent after the Finoish food and chemicals group's autonucement on Tuesday that its cholesterol-cutting margarine, Benecol, would be marketed in the US by John son & Johnson.

The shares rose from FM478 to FM564.50 for a two-day increase of 53 per cent. Ana-lysts said US and UK institutional investors, excited by Benecol's US market potential had purchased large numbers of Raisio shares.

The ogreement with one of the world's top health products groups for sole rights to use Benecol's essential cholesteroi-reducing agent has rekindled laterest in Raisio shares. Until this week, they had underperformed the Helsinki market this year. However, Raisio was the bourse's hottest growth stock in 1996 after Benecoi became known oniside Finland.

Air Brian Perkins, president of McNeil Consumer Products. the Johnson & Johnson subsidiary that will market Benecol, said he had "seen very few things . . . that represent this sort of opportunity".

McNeil expects to lannch Benecol products in 5 per cent of the US market next spring and to cover the whole country in early 1999. Some 100m Americans suffer from high cholesterol.

The key ingredient in Benecoi is stanol ester, a plantbased byproduct of processes such as wood-pulping and vegetable oil extraction. Raisio's ability to obtain enough raw materials needed to make stanol ester had been questioned following production hottlenecks last year. But McNeil did not expect prohlems with supply. A production plant is to be built in the US, but it is unclear how well it will meet market needs.

ester in five or more products. including margarine, but has not yet decided which. It can be used in any food containing fat, so potential products include salad dressings, cooking oils, chocolate and lce cream. The link with Johnson & Johnson will make it easier for Raisio to get approval from the US Federal Drugs Agency to sell Benecol.

McNeil plans to use stanol

British banks rise to new peaks Investors show

confidence that finance sector will stay strong

By George Graham and Peter John in London

UK banks' share prices rose to new highs yesterday as investors shrugged off worries that the economic cycle might have started to turn sour for the financial sector.

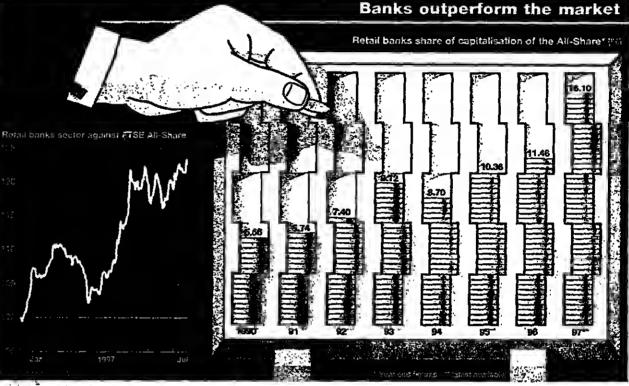

With first-half results for most of the larger UK banks next month, HSBC, the world's largest banking group, gained 3.1 per cent to £21.51p, with Lloyds, National Westminster and Barclays also advancing strongly.

HSBC's market capitalisation has doubled in the last 12 months and yesterday reached £56bn (\$93.52bn). In the last week alone, it has increased by £5bn, more than the entire market capitalisation of blue chip companies like Allied Domeco or Safeway.

Lloyds TSB, too, has doubled in value, and the banking secthird of the FTSE 100 index.

But with the sector as a whole now trading at around 16 times forecast 1997 earnings, some investors have begun to worry about the long-term prospects for their Much of the strength of bank

and gaming group, plans to split into three and buy back \$2.1bn of shares in a move that could thwart Hilton Hotels'

The split, which will not incur any tax liability, will create three new companies: ITT Destinations, a hotels and gaming hustness with the Sheraton and Caesars brands: IIT Corporation, a holding company for FIT World Directories, a publisher of telephone directories and classified information; and ITT Educational Services, which runs 60 techni-

The announcement sent FIT's share price up \$41 to

valuing the company at \$55 per share. Since then, FIT has
embarked on a programme of lation could make a takeover
asset sales, including its stake of the future FIT Destinations in Madison Square Garden, the New York sports arena.

Mr Rand Araskog chairman and chief executive of ITT, said that, after the split, "TTT shareholders will own three dynamic companies on a taxfree basis and retain all the upside. Hilton cannot execute our plan, because it could not do a tax-free spin-off...for five years." Hilton declined to comment

on its next move. Mr Stephen Bollenhach, chief executiva officer, said: "If ITT wanted to create shareholder value, they

\$6.5bn hid for FTT in January, increase its hid, but not until it knows what it is huying.

impossible since it could trigger a large tax bill

Mr Harold Vogel, an analyst at New York investment bank Cowen & Co, said he was "very happy" about the split and "not worried about ITT getting away from Hilton", as the split should improve shareholder value. The tender offer to buy back 30m shares at \$70 per share will open today, and the split will occur in September.

As part of the plan, ITT has acquired the 20 per cent of ITT World Directories It did not already own.

D to undercut NTT on long-distance calls

By Bethan Hutton in Tokyo

KDD, Japan's largest international telephone service operator, is to move into the domestic enter the domestic market in a big long-distance market, undercutting NTT, the market leader, by more than 50 per cent.

Existing long-distance rivals to NTT charge about 20 per cent less. KDD plans initially to offer the service to its corporate customers from the end of this month. However, as KDD has limited domestic infrastructure it is unlikely to take

a big share of the market quickly. "KDD will not be in a positioo to way until the Japan Information Highway submarine cable link is completed and brought into service, and the target date for that is spring 1999," said Mr Andrew Haskins, telecommunications analyst at HSBC James Capel in

KDD is investing Y130bn part of a search for new markets (\$1.12bn) building the JIH, a fibreand revenue sources when KDD's optic cable encircling Japan. This traditional territory is being will be linked to the regional networks of nine electric power companies which have formed an alliance with KDD. Until it is open,

the company's long-distance services will mainly use leased lines. KDD hopes for sales of ahout Y2bn in the first year.

The move into the domestic long-distance market is seen as have also eaten into the Japanese

and revenue sources when KDD's squeezed on two fronts.

Deregulation is allowing new competitors into the international market, where KDD was previously almost guaranteed a dominant position, and new technology is creating ways to cut costs, for exampla with internet telephony. International call-back services

market and KDD's profitability bas already been affected.

This year it reported a 14 per cent drop in profits for the 1996-97 financial year.

tempting partner.

"They are obviously in a fairly desperate position - the ground is being shot from under their feet on a daily basis," said one analyst. The higgest blow to KDD's position is vet to come, when NTT is allowed to offer international telenhoue services.

ASIA-PACIFIC NEWS DIGEST

Format agreed for memory card

1 p 1 1 2 W.

Six Japanese consumer electronics companies have agreed a format for an integrated circuit memory card for digital cameras and other products. The new card, called a "memory stick" because of its long, thin shape, will be adopted by Sony, Casio, Fujitsu, Olympus, Sanyo and Sharp. The companies hope the format will be taken up by other manufacturers. Currently, each manufacturer has a different format for the memory cards used in its digital cameras and other products.

The memory stick will be able to store between two and 32 megahytes of sound and still picture images, and the information will be stored in eight-kilohyte blocks rather than the 512-byte blocks now used, in order to improve search speeds. The stick shape should also allow for more flexibility and compactness in product design. Products using the new format could be available next spring. Int-

tially mainly in Japan. Digital cameras are becoming increasingly popular in lapan, but they have been slower to take off elsewhere. According to Sony, around 500,000 units were sold in Japan last year, and sales this year are expected to reach between 750,000 and 1m.

■ JAPANESE RAILWAYS

Managers named for JR East sale

Nikko Securities and Morgan Stanley Japau have been chosen as lead managers for the sale of the second tranche of shares in East Japan Railway (JR East), JNR Settlement, the Japanese state-run body established to handle the dehts and listings of railway companies from the now defunct JNR group, did not specify a date for JR East's secondary listing, but said it would come only after the October 8 listing of Central Japan Railway, another rail operator, JNR Settlement said it would assess market

conditions before the second release of JK East shares. The initial listing in 1993 covered 2.5m state-owned shares of JR East, That was fullowed by the flotation of 1.7m shares in West Japan Railway (JR West) in October

Central Japan Railway, also known as JR Tokal, will be the third JR company to list on Japan's stock exchanges, and securities analysts have cautloned that it could affect the supply-and-demand balance of shares in the other two Gwen Robinson, Tokyo former JNR rail operators.

Much more than a debt of gratitude

After Kia, analysts fear that Korea's banks will be forced to mount more rescues

third largest carmaker, is likely to increase pressure on an already overextended hanking industry committed to saving conglomerates from possible collapse due to a weak economy. Kia'a creditor hanks, led

by Korea First Bank, decided on Tuesday to bail out Kia after they determined it was in danger of failing to meet debt payments, although Kia said it had not sought the surprise action.

Kia has had problems servicing its debts of Won9,500bn (\$10.7bn) because of a slump in domestic car sales, while rumours about its financial health created difficulties in securing new loans.

It was the third rescue of a threatened Korean conglomerate, or chaebol, since April non-bank financial instituwhen the main banks tions. decided to prevent more big corporate bankruptcies following the collapse of the Hanho and Sammi steel groups this year. The others are the Jinro liquor and Dainong textile groups.

The banks said the bankruptcy prevention programme was necessary to curb the growth of bad loans to Korea's highly-indehted industrial groups and avoid further downgrades in international credit ratings. Although the banks are

The financial rescue of nomic recovery will soon ing agencies, such as Stan-auffering a net loss of most likely outcome is that Kia, South Korea's reduce the need to save troudard & Poor's and Moody's, Won129bn in 1996, and they it will be sold to someone hled chaebol, analysts ara worried that the banks will be forced to mount more rescue efforts. Banks are already owed

Won7,200hn from the three chaebol they have rescued. The total includea Won5,380hn for Kia, Won1,200bn for Jinro and

Some observers are sceptical that Kia will be able to improve its finances quickly

Won603bn for Dainong. Kia also owes Won4,050hn to

"I don't exclude the possibility of more bankruptcies occurring among the chaebol, although Kia will probably be the biggest," says Mr Yoon Yong-chul, banking analyst for SBC ,Warburg Securities in Seoul.

Bank shares fell by 5.3 per cent on the Seoul bourse yes-IBCA, the European credit

rating agency, says it will review its Korean bank and sovereign ratings in response to the Kia bail-out. "I expect other credit ratto follow auit," aays Mr Henry Morris, managing director of Coryo International tH.K.), a Koraan investment group.

Worries that Korean banks will suffer funding shortages due to problems in raising overseas capital has prompted the central bank to provide Won1,000bn in emergancy loans to the banks through repurchase

The Kia bail-out poses new problems for Korea First Bank, the carmaker's largest lender after Korea Development Bank, the state-run industrial bank. Korea First also had the blggest exposure to the collapsed Hanbo steel group, which caused its international credit rating to be lowered.

The banks are hoping that Kia will be able to resume dabt payments after a twomonth grace period as it seeks to restructure its operations. Kia said yesterday it planned to sell Won1,900bn in property assets, cut its workforce and halve the number of its sub-

sidiaries to 14. The group may be forced to dispose of several troubled units, including its commercial vehicle, steel and engineering companiea, which are mainly blamed for its financial problems. These three subsidiaries warc largely responsible for Kia will not help much. The

Won129bn in 1996, and they account for half of Kia's total debts.

In contrast, Kia Motors, its passeoger car company, is considered relatively healthy, with profits of Won7bn last year and a debt level two times equity strong hy Korean standards. The Kia group has also

Potgietersrust Platinums Limited

(Incorporated in the Republic of South Africa) (Registration number 01/08353/06) ("PPRust")

collectively ("the Amplats Group")

Salient dates regarding the proposed restructuring of the Amplats Group and disposal of Amplats' shareholdings in its unlisted diamond trading companies

1. INTRODUCTION

Further to the announcement of 11 June 1997, shareholders are reminded of the tollowing details regarding the proposed restructuring of the Amplats Group and the disposal of Amplats' shareholdings in its unlisted diamond trading companies ("DTCs"):

1.1 The restructoring 1.1.1 The unbundling

Subject to the approval of Amplats shareholders, the RPH shares held by Amplats are to be distributed to Amplats shareholders ("the unbundling").

1.1.2 The schemes

Simultaneously with the unbundling, schemes of arrangement in terms of section 311 of the Companies Act (Act 61 of 1973), as amended, will be implemented as proposed by RPH between:

- Amplats and Amplats shareholders;
- PPRust and PPRust shareholders, other than RPH and Amplats; and
- · Leplats and Leplats shareholders, other than RPH and Amplats,
- (collectively "the schemes").

Scheme participants will become entitled to receive RPH shares in the ratios set out below:

	Number o	RPH shares per 100 shares held	
Amplats		46*	
PPRust		41	
Leplats		6	

*comprising the unbundling consideration and the Amplats scheme consideration.

Upon the schemes becoming operative, RPH, which is to change its name to "Anglo American Platinum Corporation Limited", will become the listed critity and holding company of the restructured Ampiets Group. Ampiets, PPRust and Leplats will be delisted.

1.1.3 Rationale for the restructuring

The unique competitive advantages of the Amplats Group are its extensive portfolio of viable mineral resources and its financial strength. The Amplats Group intends to utilise these advantages to move down the industry cost curve by adding to and enhancing its suite of cost competitive production sites, not only to improve margins, but also to take advantage of market opportunities for growth.

Accordingly, the Amplats Group needs to have unconstrained choice in developing new mining projects in order of profitability and in determining the optimum production mix from its various production sites in any given circumstances. The Amplats Group would be serving a single body of shareholders which would permit maximum operational flexibility. Such flexibility would enable the Amptats Group to manage its asset base more effectively, so optimising its position on the industry cost curve for the long-term benefit of all its stakeholders.

In order to allow the Amplats Group to focus on its core business of producing, refining and marketing platinum group metals, Amplets will dispose of its shares in the DTCs to De Beers Consolidated Mines Limited, Centenary Holdings, Anglo American Investment Trust Limited and companies associated therewith, subject to the approval of Amplais shareholders and the relevant authorities. The consideration for the disposal will be US\$194.5 million for the foreign DTCs and R309,8 million for the South African DTCs and will be settled in cash. The disposal is not conditional upon the restructuring.

2. IMPORTANT DATES AND TIMES

Relevant Important dates and times are set out below. All times are local times in South Africa:

Annual results of the Amplats Group announced and final dividends declared in respect of Amplats, RPH and PPRust on Last day to lodge forms of proxy for the general meetings of Amptats and RPH shareholders by 09:30 and 10:30 respectively on

Last day to lodge forms of proxy for the Amplats scheme meeting, the PPRust scheme meeting and the Leplats scheme meeting by 10:00, 11:00 and 12:00 respectively on Last day to register in order to vote at the general meetings and the scheme meetings on

General meeting of RPH shareholders to be held at 09:30 on Amplats scheme meeting to be held at 10:00 on

General meeting of Amplats shareholders to be held at 10:30 on PPRust scheme meeting to be held at 11:00 on Leplats scheme meeting to be held at 12:00 on

Court hearing to sanction the schemes on Record date to determine participation in the schemes and the unbundling at the close of

Last day to register for final dividends in respect of RPH, Amplats and PPRust on Operative date of the schemes on

Termination of the listings of Amplats, PPRust and Leplats shares on the Johannesburg Stock Exchange ("the JSE") and PPRust and Leplats shares on the London Stock Exchange ("the LSE") from the commencement of trading on

Name of RPH changed to "Anglo American Platinum Corporation Limited" and name of Amplats changed to "Amplats Limited" with effect from the commencement of trading on Commencement of listings of Anglo American Platinum Corporation Limited (formerly RPH) shares issued in terms of the schemes on the JSE and the LSE from the commencement

Expected date of publication of an abridged form of revised listing particulars of Anglo American Platinum Corporation Limited (formerly RPH) in the South African press on Anglo American Platinum Corporation Limited (formerly RPH) share certificates and fractional and entitlement cheques, where applicable, posted to scheme participants

(if documents of title are received prior to the operative date or, failing that, within five Monday, 8 September business days of receipt thereof by the transfer secretaries) on

Each meeting referred to above (except the general meeting of RPH shareholders which will commence at the time given) will commence at the times given above or so soon thereafter as the preceding meeting has been concluded or adjourned.

3. IRREVOCABLE UNDERTAKINGS

South African Mutual Life Assurance Society, and funds under its control, Saniam Asset Management, and funds under its control, Liberty Life Association of Africa Limited, and funds over which Liberty Asset Management has discretionary management, Norwich Investments SA Limited, the Mine Officials Pension Fund and the Mine Employees Pension Fund have all given irrevocable undertakings to agree to the schemes and approve the resolutions relating to the restructuring and the disposal in respect of Amplats shares, RPH shares, PPRust shares and Leplats shares held by them at the date of the relevant general and scheme meetings. As of today's date, these undertakings represent in aggregate 22.5% of the Amplats shares in Issue, 17.8% of the RPH shares in issue, 21.9% of the PPRust shares in issue and 14.4% of the Leolats shares in issue.

The JSE and the Securities Regulation Panel have approved the circulars relating to the restructuring and the disposal, which circulars will be posted to the relevant shareholders during the period 18 July 1997 to 19 July 1997.

INTERNATIONAL NEWS DIGEST

Ispat aims to double output

Mr Lakshmi Mittal, chairman of Ispat, the international steel group, said yesterday he aimed nearly to double production. Unveiling plans to float about 16 per cent of the company on the New York and Amsterdam stock markets, the London-based entrepreneur said he would use some of the estimated \$460m from the share offering, which values the group at about \$2.8bn, to step up output over the next two years. His plan is to offer 19.25m shares on the two markets in the first week of August, at

between \$22 and \$26 each. Mr Mittal said the proceeds would be used to pay off a \$90m loan and to finance expansion. The company has already sealed an agreement in principle to acquire the long products division of Thyssen, the German steelmaker, and it is one of the 11 pre-qualified bidders for Sidor, a government-owned Venezuelan steel plant.

Ouestions as Eurotunnel slides

The head of an association of investors in Eurotunnel, the

troubled operator of tha Channel tunnel rail link, yesterday demanded a stock market inquiry into why the com-

pany's share price continued to fall sharply. Mr Christian

Cambier, head of the Association of Eurotunnel Share-

holders, made public a letter to the head of the Commis-

sion des Opérations Bourse, the French markets watch-

dog, expressing concern at the "massive" fall in the share

price since the company's extraordinary general meeting

hriefly on Friday, after the EGM, at FF78.70, but have

cessor. After assisting hlm group's L1,705hn (\$974.8m) mercial and critical success

But Chanel struggled for a decade after Coco Chanel's death in 1971, and the Gucci hrand suffered from years of perfumes, homewares, feuding among Gucci leather goods, sunglasses ci's squahhling heirs, and the dozens of other prodfeuding among Guccio Guc-

ven Christian Dior,

which enjoyed instant ■ success after its founder's sudden death in 1957 - when the 21 year-old Yves Saint Laurent unveiled momentum under suhsequent designers. Its present owner, LVMH, the French Chanel in the 1980s and, luxury goods group, is now more recently. Tom Ford's at waiting anxiously to see

ano, can revive Dior, and if Marc Jacobs, a young New Yorker, will do the same for its Lonis Vuitton luggage

There are some hopeful signs for Versace's future prospects. It has a strong signature style, which is essential for a fashion hrand's longevity, as well as its distinctive Medusa logo.

One complication could be the relationship between Mr Santo Versace and his sister. who own 33 per cent and 20 per cent, respectively, of the main family bolding company. It will not be clear bow Gianni Versace's 45 per cent stake will he divided

saees can avoid a repetition of the Gucci feud.

The family also has to decide whether to go ahead with long-standing plans for a flotation on the New York and Milan stock markets. The Versace group has flourished in the 1990s, with net revenue rising from L221bn in 1990 to about L845hn last year and pre-tax profits from L26hn to an estimated L175hn over the same period.

Until Gianni Versace's murder, the flotation was set for next spring. Prospective advisers were queueing up to represent the company. despite speculation that It had malia connections. The family denied such rumours, and secured an out-of-court settlement from the Independent on Sunday newspaper in 1995 over accusations of mafia money laundering.

The Versace group said vesterday that it Intended to make a formal announcement on its flotation plans. Investment hankers consider It highly unlikely that it will now float as early as next

"If they manage the hrand well, they should eventually be able to go to the market,' said a US banker in Milan. "They'll probably have to walt for a another cycle of collections to be completed. to prove that they haven't lose their touch."

experience
than anybody.
Anybody.

DIGITAL now has over 1,000,000 seats for Microsoft Exchange under contract.

An impressive number, for sure, but more important, made possible by DIGITAL's real-world Windows NT* solutions implementation experience. Plus a broad alliance with Microsoft that's built on a relationship that's over a decade long. DIGITAL has been close to Windows NT since its very inception, and is leading the way in 64-bit computing for the next generation of Windows NT. We currently offer the industry's most extensive line of Windows NT hardware, software and solutions, across the Intel® and Alpha™ platforms. But what matters most in a large Exchange rollout is making it all work. DIGITAL has more trained and certified Windows NT experts than any other Microsoft partner. All of which goes to show, when it comes to Microsoft Exchange and Windows NT, nobody has more experience than DIGITAL. Nobody.

US Treasuries lifted by low inflation data

GOVERNMENT BONDS By John Labate in New York and Vincent Boland

in London US Treasury prices moved higher after consumer price index data were released. By early afternoon the benchmark 30-year Treasury bond was # higher et 101 . send-

ing the yield down to 6.481 per cent. issues, two-year Treasury notes rose & to 100%, yielding 5.861 per cent, while

10-year bonds gained % to 1032, yielding 6.194 per cent. Reaffirming the low inflationary outlook held by most analysts, yesterday's release of the CPI for June showed a modest 0.1 per cent rise. In addition, figures for June industrial production came while capacity utilisation for through the 8,000 level for

BoS deal linked to **UK** house prices

By Krishna Guha

Bank of Scotland yesterday issued the first eurobonds linked to UK house prices. The bank issued £105,6m of floating-rate and £27.2m of fixed-rate bonds through two ring-feuced subsidiaries. Bank of Scotland SAM 1 and

Lead manager SBC Warburg said the issues marked the opening of a "new asset class". It said the bonds were well received by UK institutions, which can use them to hedge against earnings-linked Habilities.

The bonds are backed by "shared eppreciation" mortgages, or SAMs, which offer house buyers a choice of low interest rates in return for different stakes in capital appreciation. investors receive below-

market conpons plus e share in capital gains when houses are sold or the owner dies. The £105.6m floatingrate issue, backed by a popular zero-interest SAM, pays 60 per cent of three-month Libor minus 30 basis points to 2027, when the rate steps np to 60 per cent of Libor plus 10 points.

The coupon is secured by issning more bonds than underlying mortgages, and reinvesting the surplus in interest bearing deposits. The fixed-rate bond issue

pays e 4.2 per cent coupon until 2027, stepped up to 5.2 per cent. The coupon is paid from the interest charged on low-interest SAMs. which sold badly.

Both issues - which will amortise with the underlying mortgages - have a maturity of 75 years. Bank of Scotland has an option to redeem remaining bonds once 80 per cent are amor-

CURRENCIES AND MONEY

Relaxed German stance helps dollar

MARKETS REPORT By Simon Kuper and Greta

The dollar and pound held forex moves closely. Mr Jerfirm near six-year highs yes- emy Hawkins, chief econoterday as an expected Ger-D-Mark never came.

Traders had thought the lar and I don't think it's German government would impressed anyone."
say that the D-Mark's slide The market had e since spring 1995 had gone stronger words after recent too far. But the actual state- aggressive pro-D-Mark state- II The Norwegian krope rose ment was mild.

said: "There is no reason to and Mr Hans Tletmeyer, dramatise recent developments on foreign exchange markets." The rise in the dollar and pound "should be days, and 15 pfennigs seen against the backdrop of economic developments in 20, due to Germany's weak the US and Britain." Specu-economy and fears that the lation ahead of European monetary union "could also have led to an overreaction of markets". The weak D-Mark had boosted German exports, he acknowledged. His comments reduced

Jul 16

market fears that Germany putative euro would be soft. and other Group of Seven states would intervene to persisted and the dollar and help the D-Mark, although he said they were watching mist at the Bank of America gling against resistance at man call for a stronger in London; said: "It'e a lukewarm attempt to cap the dol-

The market had expected ments from Mr Theo Waigel. A government spokesman German finance minister, Bundesbank president. The D-Mark has fallen 5.5 pfenagainst sterling since June economy and fears that the

Norilsk puts Italian smelter scheme in doubt

By Kenneth Gooding, Mining Correspondent

A \$264m scheme to convert the Crotone zinc smelter in italy so that it could produce nickel, copper and cobalt from raw material dams and then ship the upgraded supplied from the Norilsk group concentrate to Italy for further in Russia has run into serious refining. But new management at

not only for the zinc market, need two or three mooths to which is currently riding high, but also for future western invest-

Osmium Holdings, owned by UK and US investors, last year signed agreements with Norilsk to process 11m tonnes of iow-grade concentrate (an intermediate material) at present held in waste Norilsk is insisting on reviewing The situation has implications the agreements and says it will decide if it would be more profit-

able for the Russian group to pro-

Consequently, Osmium has told reflecting this situation, having the timing of Crotone's closure Italian state energy group that owns the Crotone smelter, it would not be able to meet the July 31 deadline to huy the facility. This has raised fears that Eni might start the permanent closure of the smelter, which produces about 100,000 tonnes of zinc a year (roughly 1.85 per cent of the western world total) when the zinc market is widely expected to show a substantial supply deficit. Lon-

Ente Nazlonale idrocarburi, the jumped nearly \$300 a tonne, or more than 25 per cent, this year. However, Mr Angus Macmillan, research manager at Rilliton Met-

als, said: "i would be surprised if Eni closed the smelter, It is in an area of high unemployment and, although it is old and not particularly efficient, at today's prices it should be profitable.

Billiton is forecasting a zinc supply deficit of 250,000 tonnes this year and one of 120,000 tonnes don Metal Exchange prices are in 1998. Mr Macmillan suggested

some time, the impact will be lessened by the additions to [zinc production] capacity planned for the next couple of years."

Osmium, which has SBC Warhurg, the investment bank, as its financial adviser and one of its shareholders, has said it would keep all 450 employees at Crotone if its scheme went ahead. It hoped to produce 17,000 tonnes of nickel, 8,400 tonnes of copper and 320

The company said it also expecwould be important. "If it takes ted that European Union and government grants would cover about \$100m of the estimated \$264m capital cost

Some Osmium shareholders are furious at Norlisk's failure to honour legally hinding agreements But an Osmium spokesman said: Osmium is still greatly committed to the project. If the deal can get back on track before the end earlier, despite being of this year, it may be possible to sharply lower for much of renegotiate the arrangements

Worst over for NZ wool

By Terry Hall in Wellington

New Zealand's wool prices ended the 1996-97 season little changed from a year earlier, despite being.

A late surge in demand for all types of wool, encouraged by aupply shortages. saw the market indicator finish 1996-97 at NZ34.63 a kiln, just one cent lower than a year before.

Optimists are taking the sharply improved tone of last month's sales as a posttive sign that the worst may be over, and that prices will strengthen over the coming 12 months, boosted by the bnped-for recovery in the commodity cycle.

The strength of the mar ket in the closing stages of the year saw the wool indicatnr hitting the season's high of NZ\$4.73 a kg at the Christchurch saie on June 19, althnugh it slipped back to NZ\$4.63 at the final sale in late Jnne. Two months ago, in April and May, the average auction prices were hovering just over NZ\$4.

ingly from battery hens. However, despite the end-He says production costs of-season huoyancy, the profor free-range eggs are 40 per visional figures from Wools of New Zealand, published yesterday, suggest the average price for the season as a whole was NZ\$4.49, 9 per cent lower than last season's Vergerson say average of NZ\$4.94 cents

One factor was the strong New Zealand dollar, which helped depress prices for much of the season. The provisional figures show the wool trade weighted index (which measures the currency of the main wool buying nations against the New Zealand dollar) averaged 130.6, 7 per cent up on the

previous season. Prices increased for all types in June, with the fine, medium and lambswools all recording new season's Maggie Urry highs.

Service and

Premium on copper eases

MARKETS REPORT By Kenneth Gooding

The premium for copper for London Metal Exchange eased slightly yesterday after the LME reported a big jump in the stocks in its authorised warehouses on Tuesday - of 17,025 tonnes, or nearly 12 per cent, to 160,325 tonnes.

The premium, to the price of copper for three-month delivery, shrank to \$185-\$195 a tonne from a peak of \$270

on Tuesday. The increase in stocks had heen widely anticipated and more are expected because the technical squeeze on the LME has pushed Londoo copper prices well above those on the New York Commodity Exchange. This has encouraged copper merchants to shift material from Comex to LME ware-

Meanwhile, there were warnings that another technical squeeze was building.

"The zinc market is gearing up for an approaching period of technical tightness, concentrated in late September and early October," said Mr Alan Williamson, analyst at Deutsche Morgan Gren-

hig Zhuzhou zinc smelter had built up a large short position. "As a smelter, it can produce more metal hut culties getting enough raw

material." said one. Three-month tin prices dropped to their lowest for more than two years. Traders said selling hy investment funds caused the drop. which was exacerbated when tin crashed through \$5,500 a tonne, a key technical support level

Robusta coffee futures managed to stage a small rally on the London International Financial Futures Exchange, with the benchmark September contract closing at \$1,620 a tonne, up some \$35.

However, the day's trading was once again volatile and the contract had touched a five-month low point of \$1,530 in the morning. On the International

Petroleum Exchange the price for Brent crude nil for delivery in September dropped 10 cents a harrel from the London opening price to \$18.32 a barrel in late trading. The drift downwards was propelled by a widespread

helief that Iraq's return to

supply will depress the mar-

fun heing an outdoor pig," admits Mr David Black, who keeps 5,000 sows on his farm in Bacton, Suffolk. Yet consumer perceptions that outdoor pigs lead a more natural existence have persuaded him to keep 2,000 of his sows outdoors. In the post-war era of cheap food, pigs were hrought indoors and hens

put in cages to cut production costs. Now the tide is turning, and consumers are increasingly concerned about animal welfare. That trend, communicated to farmers by the supermarkets, led Mr Black to reverse

the practice of his father's generation and move some pigs outside. Of the 2,000 outdoors, 850 are monitored under the Royal Society for the Prevention of Cruelty to Animals' Freedom Food scheme, and their offspring are sold to Tesco, the grocery chain. Others provide meat for Marks and Spencer's food departments. The Freedom Food label-

ling scheme was launched

three years ago in an attempt to raise living standards for the 750m farm animals in the UK. It involves annual inspections - paid checks to see that farmers are sticking to guidelines set for each type of animal. Further funding comes from a for customers to say that in producer levy and a retailer

Farmers give animals outside chance

Outdoor pigs eat more than their indoor counterparts, but health costs are generally lower

Sharpe, general manager of Freedom Food, the aim is to improve the lot of the largest possible number of animals, through "strict but achievahle" standards, rather than aim for welfare targets only a few farmers could attain.

Animal welfare is an increasing concern for shoppers, according to a recent opinion poll carried out for the RSPCA by NOP, it found 78 per cent of UK adults wanted "better welfare conditions" for farm animals and 69 per cent of consumers were "willing to pay more for by farmers - and spot for a product from a humanely reared animal".

Mr Black is somewhat sceptical. He thinks it is easy surveys, but when they get to the checkout a higher

GRAINS AND OIL SEEDS

■ WHEAT LIFFE (100 tonnes; £ per tonne)

According to Mr Mike price might deter them, Tesco agrees, and has decided to sell Freedom Food meat at the same price as that from conventionally reared animals, to see what demand would be if there were no premium.

owever, while Tesco is charging the same price for its Freedom Food meat, the costs of keeping pigs outside are significantly higher. Feed is the main item; Mr Black says an outdoor sow eats 1.35 tonnes of feed a year, nearly 30 per cent more than an indoor

Labour costs are higher for ontdoor pigs, mortality rates are worse in winter, when cold weather can kill new-born piglets, but bealth costs are generally lower.

■ COCOA LIFFE (10 torines; E/tonne

Mr Black charges Tesco a premium for the product. cent higher than for battery "it's costing us extra, it. eggs, but the price premium should be costing the customer extra. it's not a situation that can carry on."

Tesco regards the extra cost as "an investment on our part", it reckons that as of food from countries with the proportion of mest produced to higher welfare standards increases, there will be economies of scale, and as standards are rising for all farm animals, the premium for Freedom Food-produced meat will be eroded.

It has told its UK fresh

pork suppliers they must abolish stalls and tethers from August 1 this year, 17 months hefore a UK ban takes effect. Mr Black says it will cost the "best part of £1m" to change from stalls

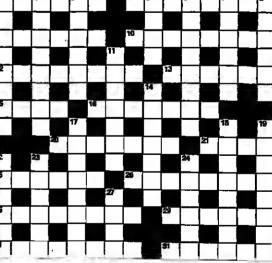

for his indoor sows.

LONDON STOCK EXCHANGE

Footsie falters on the brink of the 5,000 level

MARKET REPORT By Steve Thompson, UK Stock Market Editor

The London equity market was rampant yesterday, with the FTSE 100 index driving ahead to challenge the 5,000 level and hitting new intra-day and closing

Once again, the banking and pharmaceutical sectors powered the market's rise, but there was plenty of help too from Wall Street's seemingly relentless advance. The Dow Jones Industrial Average passed 8,000 in

nomic news provided no downthan expected increase in underlying average earnings, were tha 8,000 level. viewed as encouraging for sentiment in London.

had slipped to 64.9 points but the index still set a closing record of of winning performances to six straight sessions. The last three trading days have seen the leading index race up 164.7 points or

in the US, the 0.1 per cent rise side shocks for either market; on in inflation during June was well unemployment, plus a smaller Dow, which climbed 52 points on Tuesday, quickly pushed through

left floundering in the wake of this market yet; there is a short-In mid-afternoon, Footsie was the FTSE 100's advance. The age of tha good quality stocks tantalisingly close to 5,000, reach FTSE 250, although up 36.0 at that overseas fund managers ing an intra-day high of 4.991.8, 4.487.5, remains well short of its want to buy; that is enough to up 92.5. By the close, the gain all time high. And the FTSE get London through 5,000 and SmallCap continued to underperform, ending the day 1.4 down at 4,956.9, and extended its sequence 2,203.8. The SmallCap reached an takeover and merger talk had intra-day peak of 2,375.2 back on March 12.

The FTSE All-Share index powered ahead to finish 26.2 up at

the contrary, news of a fall in received by Wall Street and tha today, given a reasonable perfor- he said. mance by the Dow".

The head of marketmaking at one big London-based securities as adding to the upside pressure, The other FTSE indices were house said: "There is no stopping beyond."

Ha insisted that the recent played only a minor part in the market's decisive upward move in recent sessions. "That obviously helped to get the market moving, but it is the build up of recent daily levels.

Squeeze drives **HSBC**

Bear-bugging squeezes saw some of the market's biggest stocks record extraordinary leaps. HSBC, which has a market value of £56bn, led the pack for much of the day to record a gain of 10 per cent at one point over the

past two days. The sbares bave been helped by brokar recommendations ahead of the interim figures and big gains in the Hang Seng index, of which

HSBC is a big constituent. One of the more enthusiastic recommendations comes from Lehman Brothers' tech-

nical analysts in the US. The chartists argued that the FTSE banks index had "technically broken out and now is resting on support into its valuation and, while (formerly resistance). Given these are necessary, there is the uninspiring performance of gilts we'd like to see the better than expected trading FTSE bank index move news. The current share above 7,100 to confirm the price bounce should conbreak-out. Such action tinue, and any sign of a Gerwould imply a target of man construction recovery 7,800; an 11 per cent gain."

Yesterday, the banks index shot forward to 7,302.0. sector's leading issues, was well above the resistance/support level and gilts shares ended the day 8 - weak recently and thus a ahead at 3051/sp. restraining influence on bank stocks, which tend to follow the fortunes of gov- the begining of the week, ernment bonds - moved for-ward by almost balf a point "buy" recommendation. The at the long end.

HSBC was up more than 100p in both classes of stock "Astead's results were mar-

bnt slipped later to close 75 higher at £20.73%p in the bers and with signs of a rising returns. The naw HK\$ stock and 65 up at recovery in UK demand and management structure is £21.51p in the Ordinaries. Both Credit Lyonnais Laing and Dresdner Kleinwort Beoson have recommended the

3.7 per cent.

stock up to £24. Meanwhile, Zeneca - the most highly priced stock in the London market - shot forward almost another 100p before closing 67 better at

The strong market trend combined with a broker's note to boost RMC Group. The shares appreciated 14 to

Agency broker Teather &

Greenwood is among those that favour the stock. In a note to clients, David Taylor at the broker said: "It has usually been right to buy RMC on a PER (price earnings ratio) discount to market and the current near 20 per cent looks excessive. The market has been factoring currency-related downgrades a substantial offset from the will lead to re-rating."

Redland, another of the also in demand and the

Ashtead Group, which reported improved figures at shares firmed 2 to 311p.

The UBS team said:

ginally ahead of our num- tainable top-line growth and potentially, hire rates, a steady branch opening programme and still good prospects in the US, we remain convinced that the group will continue to deliver well

above average rates of earnings growth. TI Group rose 131/2 to 511p with several brokers keen to point to the attractions of Matthey, helped the shares the group. The list of admir-ers includes NatWest Securities, which yeaterday a buyer of the shares and upgraded its recommendation on the stock from "hold" to "add" and indi-

poised by the imminant cated a share price target price of 560p a share. Outlining its reasons for date market by Johnson the change of stance, analysts at the broker said: "TTa strategy of building world leading businesses with a tor. "We believe JM and its high knowledge and service partner to have sales agree-

runours sent the shares up

Among food retailers. Somerfield underperformed the market, closing unchanged at 195%p, following publication of a broker's

"sell" recommendation. Urging investors to take profits, Credit Lyonnais Laing said: "We see sales trends downwards, particularly in 1998/99 which will severe downward pressure on operating margins." In the water sector, a

shortage of stock continued to drive several issues sharply ahead. Severn Trent put on 6% to 882%p, while Thames raced ahead to close up 221/4 at 794p.

PRIVATE FINANCE INITIATIVE

The government's blueprint has created a greater sense of optimism about PFI, say Alan Pike and Nicholas Timmins

New scheme to speed up projects

One of the first proofs that devil, as always, will be in the government did indeed the detail, and that it is was its swift action to revive the private finance initia-

all public sector capital projects for PFI potential was scrapped. In less than two been produced. It replaces the private finance panel and executive with a new Treasury-based taskforce.

Legislation making it clear that both NHS Trusts and local government have the legal powers tn sign PFI deals will shortly become law. The number of big NHS hospital projects has been elashed to 14, and a string of other reforms, including taskforce inside the Treastreamlined tender documen-

Prioritisation has become the watchword. In future, the six to eight-strong Treasury task-force will "roadtest" schemes, signing off their commercial viability before they are advertised.

The final corner of the jigsaw was put in place last week when Mr Adrian Montague, 49, co-bead of global project finance at Dresdner Kleinwort Benson, was installed as chief executive of the new task force.

The result has been a clearer sense of optimism about PFI than at almost any point in its five-year his-

intend to be New Labour delivery, not declarations of good intent which willfinally count.

Of all the changes, the Within a week of taking scrapping of universal test-office the requirement to test ing for PFI was the most welcome, along with the plan for the Treesury to give deals its seel of approval at months a new bineprint to the start of the process drive schemes through had rather than at the end. Both look to be sure ways to cut delays and to reduce bid

> spread feeling in the private sector that the panel had outlived its usefulness. But there are concerns about the loss of the executive, which had acted as a semi-independent PFI consultancy. The sury will inevitably be subject to greater policy control. It will also be small consisting of six to eight people. It is still being assembled. The Bates review set it a series of tasks to complete by October which it may be pressed to achieve. Furthermore, will such a small team be able to undertake the preapproval of all PFI projects. even if it is fewer and better projects they are examining? Mr Geoffrey Robinson, the

ish. He hopes the private sector will release people to the taskforce quickly, "because they are coming to unblic service. It is not as

Paymaster General, is bull-

However, some worries

table, "is tight, but we shall And he believes the team will cope with pre-approving projects. "Where something isn't properly ready, they will send it back [to the strengthened departmental teams which are planned] until it is. They won't have to do all the work themselves." The Paymaster General concedes that "it may be difficult to reach the red book totals" of £10.5bn capital spending over the current three years. "But it won't be because we have too much work, it will be because we are not working in as prioritised a manner as we should. That's the key to it. It is concentrating on the deals which are priority and

do-able. If you do that you

trate a move". The time-

is what we had." : There is also a welcome for the moves to cut bid tory. The only reservations though they are going to a costs and to vet advises to long-term public-private finance unit is now from the private sector are a competitor where employers ensure that they really do partnerships. Siemens, for managing director of infrastructure warning that the might seek to delay or frus know what are talking example, is involved in joint structure, it is already hap-

ebout, in the NHS alone, payments to consultants while the private sector estimates that its costs have been at least double that.

sider reducing the maximum number of hidders and the thorny issue of compensation for failed bids - an area where Mr Robinson is decidedly cautious. It is something the government will consider for future schemes, he says, but "there is no commitment". The government does intend to allow local authorities to compensate contractors if deals are overturned in court. Many contractors, how-

ever, now want to see to what extent the future focus will be confined to bigger projects. Ms Sheila Beck, of Sie-

get a lot more done than with a scatter gun which mens Business Services and looks at everything but a former member of the Prinever does anything - which vate Finance Panel, emphasises that public sector managers should not regard PFI as the only basis for

venture companies with local authorities where she growth potential. Bankers such as Hambros.

along with 4Ps, the body charged with promoting the initiative in local government, are also keen to hun-dle up school refurbishment projects into deals of perhaps £40m to £50m to tackle the £3.2bn backlog of school backlog maintenance although others question bow easy it will be to do that within a single local author-

ity, let alone across local anthority boundaries. However, the £1.3hn for school refurbishment from the windfall tax should help PFI's development is also

leading to changes on the corporate side - the creation of companies which specialise in PFI as opposed to consortia assembled for the At CIBC Wood Gundy,

where Mr Douglas Hogg, former chief executive of the pening for its waste management projects. BICC has created Balfour Beatty Capital Projects tn manage and develop a portfolio which includes three DFBO roads. and the Edinburgh Rnyal Infirmary, the North Durham hospital and a London Underground power project

for each of which it is the

preferred bidder. Such ventures, Mr Hogg argues, will end up as stock market quoted companies bidding for new work and operating much like privatised utilities. Running schools and hospitals will be no different from the privatisation of past national assets such as the utilities, he says. "It is just that schools and hospitals start off as individ-

ual assets. They are not businesses in the way water and electricity are. But in five to 10 years' time these assets will emerge as major utilities businesses providing schools and hospitals and roads to the public sector." If such success is

achieved, hig issues emerge service over a long period of further down the line. Mr time when it may well have

west Markets, points nut whether to provide certain that PFI is in some ways the opposite of the pension probtion having tn pay twice as pensions are privatised, PFI means that the present generatinn is paying neither for

As the revenue committed builds, the government of the day's public sector borrnwing requirement (PSBR) arithmetic will come under pressure from the cumulative cash payments. Mr McKechnie says. Some tough choices will emerge; raising taxes, charging for currently

the capital investment of the

past which it enjoys, nor for

today's capital.

free services, reducing public sector provision in the areas not covered by contracts, or borrowing. "The future cash outflows under PF1 contracts are analogous to future debt service requirements under the national debt, and, potentially, more onerous since they commit the public sec-

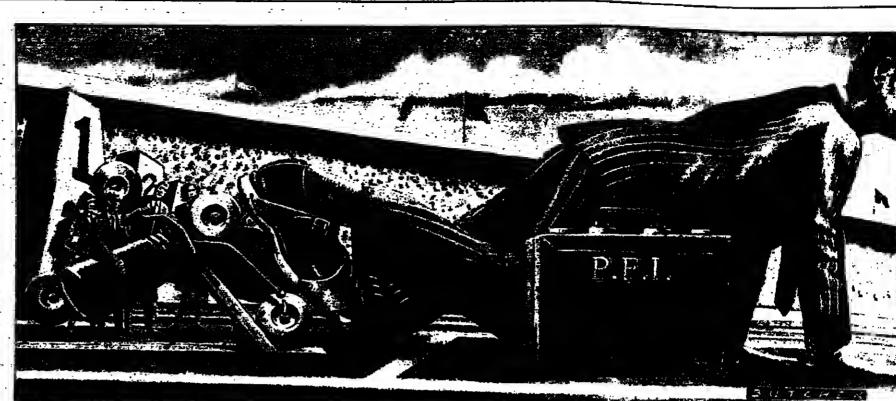

tor to procuring a specified

core services of the welfare

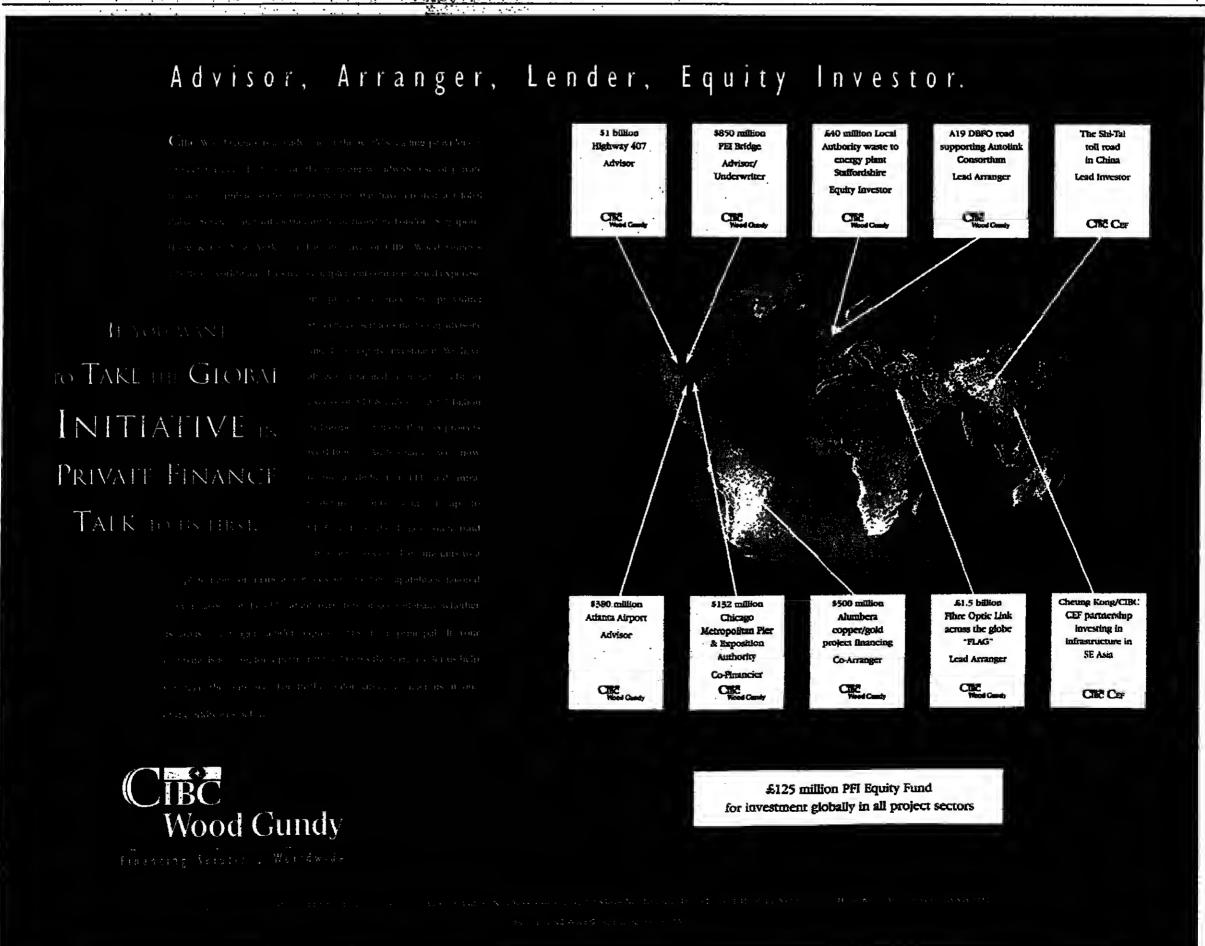

lunch. All the more need therefore, Mr McKecknie argues, to select carefully which projects go ahead and monitor the future nutflows. "If government does not do that, the financial markets will act in its stead."

At present, that is a cloud on the horizon. For Mr Robmoving is what counts, For what started out under the Conservative government as an ideologically sound idea for adding to public sector capital has, for new Labour. become a necessity. Five years after its launch. Mr Robinson says, PFI is now plainly "beavily substitutional" for conventional public capital, and the targets must be achieved.

"It won't be easy," he says. "nothing ever is. But the alternative is that we will be investing at woefully inadequate levels to maintain our services - our schools, transport, prisons, infrastructure Gordon McKeehnie of Nat- changed its views on how or and hospitals."

TRANSPORT • by Charles Batchelor

Public-private partnerships on the way

The biggest test of Labour is likely to be its handling of London's Underground

Transport projects seem set to take up a large chunk of Labour's programme of public-private partnerships just as they dominated the early stages of the previous gnvernment's private

finance initiative. The spending backlog which must be made good if Britain's transport infrastructure is to be brought up to date and the scale of the investments needed herald a busy programme over the next few years.

Precisely how the new partnerships will work in the transport field is not yet clear despite the publication last month of the findings of Labour's review of the initia-

It has proposed 29 changes intended to weed out projects unsuitable for partnerships before any mouey has been spent on preparing bids and to speed up the process. But in the run-up to the electioo Labour said that individual projects would the first of the series into also be expected to fit into a different aspects of the PFI. hroader transport strategy operating at a national, regional and local level. This is intended to overcome the criticism that previous schemes, particularly the design, build, finance and operate (DBFO) roads initiative, concentrated on projects which could be not a theoretical publicly financed but which did not funded option. necessarily fit into overall

transport needs. This raises a new set of issues. Fitting individual projects into a broader transport policy context, including generating the maximum social return from the funds used, suggests that projects which are less viable in purely commercial terms

will be developed. This appears to indicate

that a greater injection of public funds will be needed despite Labour's commitment to tight hudget constraints.

Mr Jim Dawsoo, chairman of Gibb, an engineering consultancy which has been involved in 50 private finance schemes around the wnrld, describes this as "a conundrum" which has yet

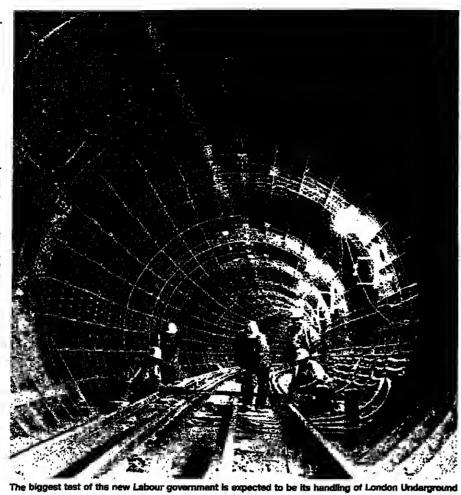

While Labour fashions its public-private parmerships the argument continues over whether the Conservatives' PFI programme delivered value for money.

A Highways Agency review of the first eight DBFO schemes concluded that savings of 15 per cent had been made on comparable public sector projects. But Transport 2000, lobhyists for public transport, said it refused to believe these figures, pointing out that the estimates for public sector schemes typically undershot the real outcome by 28 per

critic, the National Audit Office, raised doubts about the whole basis for deciding on PF1 schemes. Its report into the £23m Skye bridge, queried the Scottish Office's failure to compare the bridge with the alternative of improving the facilities of the existing ferry service. in future, the NAO concluded, departments should compare their proposed PFI

deals with real alternatives, The biggest test of the new government is expected to be its handling of London

Underground. Mr John Prescott, deputy prime minister and transport secretary, caused a stir when he inadvertently revealed plans including options for the private sector to take a majority stake in the Tube.

already been active in area. "We just hope they [the involving private finance in government] are committed the modernisation of the Northern Line, in upgrading the computers of its engineering department and in its electricity supply. But effective privatisation went further than many people. including LT's management,

Roads remain the focus of a great deal of attention as the DBFO framework applied in England is adopted by the Scottish and Welsb Offices and hy local authorities around the coun-

had expected.

But the scope of the government's road huilding programme is now under review. The findings are not expected to he published until early next year but a dozen road schemes, including six DBFO contracts, have been made the subject of an accelerated review, due for completion hy the end of this month.

Companies involved in private finance schemes and tbeir hankers are keen for to it," said Mr Dawson. "We still hear objections on roads as well as on prisons and

bospitals. The financial sector doesn't like that," But if the trunk road financing programme appeared to some people to be running out of steam it is now making its long awaited shift to local authority roads.

Essex County Council launched the first project of this kind with plans to build a parallel road alongside the A130 between Chelmsfnrd and Rayleigh at a cost of

A problem with many local authority schemes is their small size, which means that contracts and project assessment procedures must be standardised if the cost of putting deals together is to be held down. "Not every project which local authorities want to carry out will he viable," said Ms Ellen Gates, of lawyers Denton Hall.

£90m.

A different problem con-The Underground bas greater certainty in this fronts the officials putting

together a private finance deal for a proposed network of road traffic control cen-

This is an ambltlous scheme, tentatively costed at about £30m, to concentrate the policing and manage-ment of the trunk road network at three regional centres which would provide sophisticated traffic information to drivers.

The results of a consultation exercise among potential private sector partners are due to be published this month hut the project will require an innovative approach, warns Ms Mary Bonar, of lawyers Wilde Sapte, "Assuming they are not to be funded by shadow tolls it is difficult to see how they would charge for providing traffic information."

This need to find projects which can create revenues for the private operator, particularly if a wider range of socially desirable schemes is to be included, may set limits to the government's private finance ambi**DEFENCE** • by Jonathan Ball

Successful ventures

Eleven projects with a capital value of £360m have been

completed PFI is at an advanced stage in the ministry of defence,

with marked progress in support services such as telecommunications and information technology. The initiative is now increasingly spreading to encompass accommodation, huildings and estates, and non-frontline equipment procurement, such as vehicles. Sixty to 70 projects are

under active consideration or in procurement, with a capital value of about £2.5bn. Eleven projects with a value nf £360m hava been completed, and a number nf large venturea are at an advanced stage.

Ms Heather Morley, of the private finance unit at Coopers & Lybrand, says: Defence is one of the most successful sectors for private finance. The MoD has well co-ordinated central decisinn-making, unlike the National Health Service for example, where there is inevitable fragmentation given the number of trusts. It has a strong private finance unit which has set priorities and carefully appraised projects before

they go into procurement. The department makea extansive use of external legal and financial consultants to advise on projects. The MoD's private finance unit includes a number of private sector personnel on secondment, and it bas launched an internal training programme which retary of state for defence, involved 600 staff last year. Additional training courses are now held on a monthly

Two significant defence rojects nearing completion include the huge £1hn Defence Fixed Telecommunications System (DFTS) and the £500m medium support helicopter project. The £67m to provide the important (capital value) Joint Services support services that keep it Staff College project is now in the final stages of negotiation. All three are at preferred bidder stage, as is the

are continuing with Thames Water.

Large building projects have proved particularly attractive to private finance. The £175m refurhishment of the MoD's Main Building in Whitehall, the £35m Chelsea Barracks rationalisation. and the £170m redevelopment of Colchester Garrison are three of the most significant ventures.

expressions of interest from potential suppliers, Chelsea is likely to issue the invitatinn to negotiate to shortlisted candidates by the end of August, and Main Build-ing has issued the invitation to submit outline proposals (ISOP) to six hidders.

The six shortlisted consorproject are: an Amey/Kvaerner consortium led by Kvaerner Corporate Development; a British Land consortium, consisting of Pell Frischmann and Royal Bank nf Scntland; Hnrseguards Group, led by Ove Arup & Partners, and including Dresdner Kleinwort Benson and Innisfree; MoDeM consortium, led by the Bucknall Group; a NationsBank-led consortlum; and Paladin Property Partnership, led hy the Trevor Osborne Property

The Main Building redevelopment is one of the most complex projects. The MoD's headquarters dates from the 1950s, and services such as beating and ventilation are now wasteful and inefficient and in urgent need of replacement

Mr George Robertson, secsays: "The MoD's main Londnn headquarters badly needs modernisation. The accommodation is of poor quality, and not up to the standard I would expect my staff to have to work in. We are seeking innovative ideas. not just to redevelop the headquarters itself but also support services that keep It running. Many key MoD personnel

and associated support staff require a central London tin

redevelopment project at the location, and the logistical water and sewage plant at problem of finding "decant" space for up to 3,000 staff is considerable. This difficulty has been compounded by the rationalisation of the MoD estate, with the recent vacation of a number of London huildings.

Mr Mark Richardson, a partner with Coopers & Lyhrand directing the advisory team for the refurbishment, comments: "Detailed proposals and full price submissions from the shortlist Cnichester bas sought are expected in the autumn. A shnrtlist of about three will then be drawn up. The successful bldder will be required to come up with an innovative solution that satisfies the department's needs and delivers value for

Vehicles projects are another important growth tia for the Main Building area for the MoD. The department categorlaes vehicles as either "white", those which have no role in a combat situation, nr "green", those which may be involved in direct support for the armed fnrces nn nperatinns. The most substantial project in this sector is a £50m contract for the provisinn of support vehicles for the army in Germany. Ryder in February 1997.

Information technology and telecommunications is the final significant area for private finance within the MoD. The £25m Training Administration Financial Management Information System (Tafmis) project is completed, and arrangements for the DFTS should be finalised within the next few months.

The MoD clearly has no significant generic problems with PFI, such as the "ultra vires" issue which is continuing to plague the local authority sector. The need for private finance to fund vital aupport services is unlikely to diminish given the inevitable financial constraints, and the initiative should continue to progress satisfactorily as defence personnel gain further experience in its operation. Jonathan Ball writes for the

FT's PFI Intelligence Bulle-

The foundation stone of infrastructure finance.

As the Private Finance Initiative opens up new opportunities for private sector investment in infrastructure projects, a single factor may determine the commercial viability of many schemes; the cost of finance,

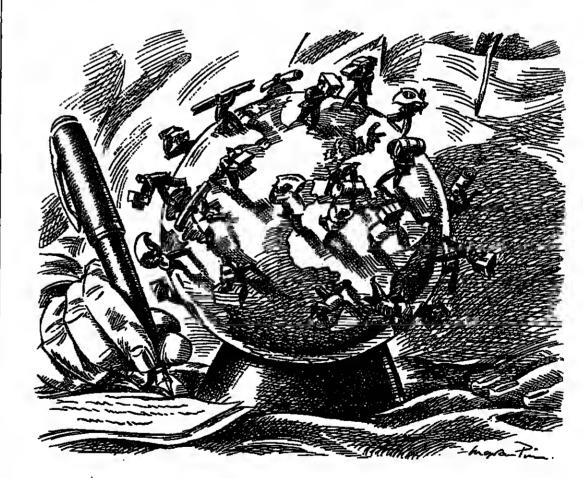

For over a decade. Financial Guaranty Insurance Company has been deeply involved in infrastructure finance in the US and now Europe. In fact, FGIC has insured infrastructure bond issues in excess of \$56 billion - and saved issuers many millions of dollars in borrowing costs in the process. Our experience and expertise in all stages of infrastructure finance is supplemented by our Ana/AAA/AAA ratings from the leading American rating agencies, our substantial financial strength and our superior claims-paying ability. The impressive resources of our parent company CE Cupital Services are an added advantage. And the earlier you involve us, the more we can assist in making sure you get the right infrastructure finance at the right price.

For further information about FGIC and how we can help, simply telephone Mary Ellen Pavlovsky on 0171-302 6030 or write to us at 20 St. James's Street Lumbon SW1A 1ES.

Mr James Stewart Hambros, an adviser to the Norfolk and Norwich, and e bidder for Dudley, one of the axed projects, say that while disappointed by that latter decision "we still see this as a positive move, in that the resources available in the smaller number of projects with greater confidence.

"And in the medium to longer term, for the next tranche of projects, people will be ehle to bld with much greater confidence. which will be good for both the public and private sec-

Last month's decision to cut the projects to 14 has its down side. It might, at £1.8bn, be the biggest hospital building programme ever in cash terms, but it was

Twenty-three projects worth to stop work, while another six in and around London worth more than £500m are on hold pending the autumn outcome of the government's

NHS review in London. The result has been bitter disappointment in Leeds. Sheffield, Hull and elsewhere where projects were thrown back to competing for a share of the ever shrinking conventional NHS capital, or taking their chances in the next wave of PFI projects.

These, however, will be run in a very different way from the process to date. the new NHS Capital Prioritisation Advisory Group, there to evaluate large capl-

tal spending.
Their judgment will be based first on what Mr Milburn said would be "the only criteria for the future" - the NHS's need for the project.

Thet means the end to what Mr Milhurn dubbed "market-driven" projects which depend only on e trust's ability to strike a deal with the bankers and builders without regard for the when the need for a will its PfT-ability be exam-

This was, Mr Milburn said. "a long overdue return to national strategic planning in the NHS". Such ideas in the past might have caused apoplexy in the private sector. Not so now. The requirement to choose projects that are both needed and will work and then get them built has become critical.

No-one is complaining about this return to the lan-guage and concepts of the 1960s and 1970s, although Ms Jennie Prica, director of the Majors Contractors Group which represents the UK's 23 biggest huilders, says ministers must recognise that once the 14 are up and running more will become possible. "The market capacity to respond will increase," she

Ministers will say amen to that. After e 30 per cent cut in NHS capital in real terms in recent years, Mr Milburn is indicating that what lim-Ited capital is available to the NHS in the future is

time? Probably, seems to be cellation programme ever. needs in the area. Only ment as new build. With so little public capital available, project has been established he said, it is in reality "PFI or bust"

عبكذا من الاحل

Despite the renewed optimism around the initiative. however, a string of issues remains. Even when the bill clarifying NHS Trusts' powers to sign PFI deals become law, there will still be weeks of work to do oo the two froot-runners before financial close is finally achieved and the first sods are cut to start building. Much more work remains to be done on the other selected

LOCAL GOVERNMENT • by Alan Pike

Doubts delay participation

A new Bill is intended to ease worries about the legal powers of councils

Local government has spent more time than most of the so-called PFI players waiting anxiously around the theatre, uncertain whether it

was going to be in the cast

or in the audience. Mucb of the delay to the successful introduction of the initiative has resulted from the same problem as that experienced in the National Health Service about whether local euthorities had sufficient legal powers to enter PFI deals, and who would eccept responsibility if any defaulted on them. But there have also been doobts about whether the scale of many potential PFI projects in local government would be big enough to ettract private sector inter-

government has shown its determination to address the first problem with the introduction of the Local Government (Contrects) Bill, which is intended to overcome private sector worries about the legal powers of councils. These doubts were fuelled by High Court decisions last year thet councils which exceeded their powers in guaranteeing loan deals could not be forced to repay £17m to Credit Suisse.

Local authorities' powers to enter a wide range of contracts for the provision of assets or sarvices will be confirmed when the bill becomes law. Councils and contractors will be barred from arguing in private legal actions that contracts are unenforceable. Contracts will still be open to challenge in public law - for example by a council's district auditor or an aggrieved council tax payer. But in the event of this leading to contracts being invalidated believes is unlikely - councils would be empowered to provide their private sector

partners with compe 4Ps, the Public Private Partnerships Programme set up last year to promote PFI and other forms of partnership in local government, not only survived Mr Maicolm Bates's review but won a flattering endorsement from it. "The 4Ps have developed a good name for themselves through identifying pathfinder projects on which to focus effort and through helping establish an effective policy framework for PFI. They have an important role to pley." concluded Mr

Mr Peter Fanning, until the election an adviser on corporate finance and tax to Labour's Treasury team and formerly a director of Nat-West Capital Markets, last month took over as 4Ps chief executive from Mr Peul Bryans, Mr Bryans had been seconded from Charterhouse Bank to set up 4Ps 15 months ago, and bas now for building up PFI advisory

The bill introduced by the government last month should, believes Mr Fanning. do much to address private sector concerns ebout entering PFI deals with local authorities. "I believe the bill, combined with indications that the government is prepared to take decisive action to eddress issues affecting the success of PFI, will create a much better atmosphere for doing deals,"

4Ps pathfinder projects are designed to test and develop PFI principles across a range private sector concerns of local government services. They include e scheme in the London Borough of Brent for the private sector to provide a complete street lighting service, including energy supply and replace ment and maintenance of

> Hereford and Worcester county council is seeking e partner for an innovative long-term approach to waste recycling, and has received bids from Onyx, Focsa and ERI for e contract with e capital value around £250m. Westminster City Council, one of the first local euthorities to use PFI for the rebuilding of Pimlico school, has turned to the initiative a second time to provide nursing and residential care

Other pathfinder projects include road schemes, renewing fire and police stations and related facilities. and providing local authorities with new office accommodation. But one of the leading priorities of the coming year will be to successfully launch schools projects. There is a substantial maintenance backlog in schools that councils are looking to PFI to eddress provided practical problems - notably packaging schemes so that they are big enough to interest the private sector - can

be resolved. tracts being invalidated - PFI is only one of several which the government forms of possible public private partnership in local government and others such as joint venture companies - are likely to remain more popular types of collaboration for some services. A study by CDC Publishing that although few eutborities describe themselves as "very enthusiastic supporters of the whole principle" of PFI, 71 per cent of those surveyed were exploring opportunities for using it.

The CDC research suggests that larger, urban authorities are finding it easiest to identify suitable projects. Most of the smaller English district councils interested in PFI would like to use it for schemes with a value of less that £5m. Although not all councils regard small schemes as non-starters - one is seeking a contractor for a £400,000 improvement to a recreation centre, funded by income from the turnstile - many councillors doubt whether the privete sector will be interested in such proIssued by Morgan Grenfeyl & Co. Limited, regulated by SEA.

Innovation in financino project finance

> the perfect basis for PFI projects

Deutsche Morgan Grenfell is a proven leader in global project finance. This is just one of the reasons why we are currently mandated on 19 PFI projects in a broad range of sectors covering transport, water, sewerage, government property, defence, information technology and air traffic control.

Deutsche Morgan Grenfell has consistently been ranked as No.1 in Project Finance. In 1996, we were voted Number One adviser with 162 global mandates and Number One with-66 mandates in Europe, Middle East and Africa;#

We arrange, underwrite and advise on senior bank debt funding. We advise on and arrange leasing finance, procure equity funding and lead capital market debt issues for PFI projects.

Powerhouse switches on to PFI projects

When Scottish Power, the Glasgow-based electricity group, won its fraught £1.7bn bld battle for Southern Water, the English utility, it mentioned an added bonus.

The Worthing-based water company would help Scottish Power in its hid to win private finance work in the water industry north of the border.

As Mr Duncan Whyte, the group's executive director in charge of the multi-utility strategy, said: "Sonthern Water gives us additional expertise, which is useful for these contracts." Staff are contracted from

Southern Water to join the group's 10-strong team working on PFI projects in Glasgow.

The acquisitive multi-utility has tendered for two PFI projects to improve facilities in waste water treatment works in Scotland and is planning a third. It has also hid for an energy He says: "Most of what project in Northern Ireland and won the contract to undertake a joint feasibility study for a heating scheme

in Glasgow. Scottish Power first decided two years ago to get involved in PFI projects. It

believes that Its core skills are particularly well suited for the task. "Managing a large asset base with a big investment programme, this is fundamentally what Scottish Power does," said Mr Fraser McCreadie, the group's PFI husiness development manager

This view is shared by several competitors. The UK's two other combined electricity and water groups United Utilities and Hyder - are both pursuing opportunities in the area. United was part of the winning consortium for Scotland's first PFI project a 25-year concession to operate and maintain the Fort William and Inverness waste water treatment

North of Scotland Water Authority Scottish Power was disappointed that it did not win this project but believes it is a long-term game. The group estimates that PFI in the Scottish water industry will be worth a total of £1bn

generation. It has not yet been able to put this theory into practice.

The closest it has come to a win so far has been the joint feasibility study with AHS Emstar, the environmental services group, looking at how to provide affordable warmth for 80,000 homes in Glasgow. Mr Whyte estimates that the total project, if the city council decides to go ahead.

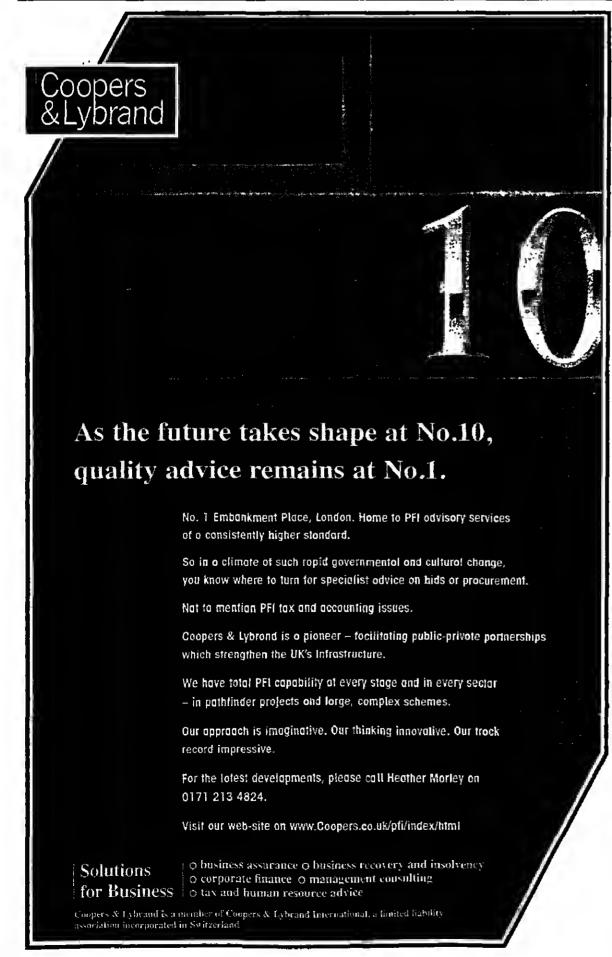

could be worth £500m. The three projects Scottish Power has tendered for so

far amount to about £200m. Analysts have estimated that each project is capable of providing returns of between 5 and 10 per cent. making each one worth between £3.5m and £7m in profits. The scale leaves City analysts largely unimpressed. "I have to say that it could be a nice but small little earner unless they sew up lots of projects." said one.

However, Mr McCreadie says, "with the cutback in the public sector borrowing requirement this is likely to be a major source of business for the future and 1 think you have got to get in on those projects at a ground

floor level". The group welcomes the early noises made about PFI by the new government. After some frustrations the initiative appeared to be gathering momentum before the election and matters now seem to be improving even more, "They Ithe government I have made proposals which, if implemented, should make a difference and speed things up," said Mr Whyle.

INFORMATION TECHNOLOGY • by Paul Taylor

Service providers accept the risk

IT managers have now begun to experiment with new procurement procedures

CAAR STAIL.

Over the past few decades, information technology service suppliers to the public and private sectors have earned an unfortunate reputation for costly errors and project delays. There have been many conspicuous failures and few umblemished

But, as Mr David Scott-Jones, a principal in Coopers & Lybrand's public services practice, noted in a recent article, many industry experts blame the way in which systems are specified and development contracts are drawn up.

Even before the advent of the Public Finance Initiative. some public sector IT managers had begun to experiment with new approaches. including specifying the outputs and service levels required rather than traditional procurement methods which often involved spending months analysing requirements and designing a system to be implemented

by someone else. PFI goes one step further by combining the concept of procuring a service rather than a system, with the additional benefit of shifting the bulk of the risk to the service provider.

...

tor should not retain either they expected to be able to the risks or the benefits of offer similar services elseownership of any assets that are developed," argues Mr Scott-Jones. The service provider therefore installs and continues to own all the equipment, replacing it at its own expense when appropri-

These principles were embodied in the Army's rivals. Training Administration and Financial Management Information Service project contract (Tafmis) - a 10-year contract valued at £25m which was awarded to EDS. the US-based computer services group, in August last

More that 30 companies the Tafmis programme – a number that was whittled down to a shortlist of three who each received the Statement of Service Requirement to bid against. Negotiations with two of the three - the third withdrew - began in

January last year. Mr Scott-Jones says the procurement process adopted ensured that the process was completed very quickly. Among the impor-

Providing you with the best possible chance of ...

a "transfer payment" - a percentage of the service supplier's revenues to be paid at the end of the contract if the next service provider is willing to take over the infrastructure.

However, as in the case of the Taimis negotiations, suppliers normally react by simply increasing their charges compensate for the retained funds. Effectively they view the transfer pay-ment as a "bonus" which they may be willing to forgo if it proves cheaper to allow infrastructure to

in the case of the Taimis contract, the negotiators decided to drop the transfer paymant and instead included a contractual requirement for a full technology "refreshment" at index linked prices.

Such adaptations reflect the fact that PFI agreements in the IT area are still complex and relatively new. "Suppliers are starting to emerge from a period of PFI scepticism," says Mr Scott-

Similarly PFI suppliers like EDS, which has won two other recent PFI contracts - the Local County Court System contract from the Lord Chancellors Department, and the £53m Oceanics National Air Traffic Services contract in the last nine months - point out that it is still early days.

PFI suppliers like EDS are also watching closely to see what impact the govern-ment's review of PFI has, In common with other IT industry executives, Mr David Courtley, managing director of EDS' public sector special business unit, believes tha new government will be more selective in deciding which projects to push through the PFI process. He believes PFI is likely to

be reserved for the larger, more complex projects exactly those that he believes PFI is most suitable for. What is clear however is that PFI is now firmly established as part of the IT procurement landscape.

As Mr Rob Wirszycz, director general of the Computing Services and Software Association, noted recently: "TI" est growing and most numerous PFI projects in government and IT may also other types of PFI projects.

"As the scope of PFI expands to include local government and education, it is vital that the pivotal role of information technology and the unique factors involved with it in procurement situations he recognised. The process definitely has to be refined from an IT perspecPROFESSIONAL ADVISERS • by Robert Rice

Critics lay down the law

Advisers have welcomed the Bates review as a way of revitalising PFI

Professional advisers have come in for some barsh criticism recently over their role in the PFI process.

Mr Alun Milburn, health minister, blamed lawyers for the fact that patients were not getting the bospitals they needed. The money available for hospital protects was not being used efficiently, he said. "£30m has been paid out by NHS trusts alone on legal fees and advice," be told an audience of PFI contractors and fun-

The Bates review of the PFI also had some hard words for professional advis-

In his 29 recommendations to Mr Geoffrey Robinson, paymaster general, Mr Malcolm Bates, chairman of Pearl Group, called for an accreditation system to improve the quality and consistency of external advisers. some of whom have proved of "varying ability".

This will involve the new Treasury taskforce checking edvisers' credentials and testing their knowledge, commitment and depth of

Mr Bates calls for the taskforce to make projects more cost effective by minimising bid costs. Part of this task will involve standardising and limiting the scope of information required from bidders. Government departments have been given until October to produce model conditions and clauses for their projects as a means of "sharply" reducing legal fees and other costs.

The taskforce has also been asked to consider "establishing ways by which the project manager and the advisers to the project sponsor are remunerated at least in part by success fees."

Although not entirely agreeing with the diagnosis, professional advisers have in peneral welcomed the Bates review as a means of revital-Ising PFL

Mr Jason Fox, a partner of Herbert Smith, the City law firm, who was seconded to the Private Finance Panel in posals will help to clarify responsibilities and address the principal structural and form a significant element of legal impediments to prog-

> The focus on creating expertise within individual government departments and the development of a policy which is responsive to the concerns of the private taking PFI forward, he says. At the moment the shorts of skills and expertise within the public sector means it

a taskforce more capable of exercising strong central control is also to be welcomed, he says. The biggest problem that has dogged PFI has been a lack of regulation of the flow of projects to market in some sectors.

Roads and prisons projects have been the exception. Allowing only three or four projects to go ahead at any one time has enabled a greater number of parties to compete for fewer projects in these sectors, thereby ensuring their success.

Contrast the health sector where 43 projects are all trying to come to market in a short space of time. "There is no prioritisation, no objective viability testing to ensure projects stack up and make sense, and no possibility of lessons being learned," be says.

Mr Fox also welcomes moves towards standardisation of documents although be believes it will only be practical to produce standard documents within specific sectors.

To an extent it already happens in both the roads and prisons sectors. The documents used for the first PFI prison project at Altcourse were only amended around the edges for the second project at Bridgend. This is possible with pris-

cannot always be regarded one and roads projects time that PFI is not the only as an equal partner. Disman because the awarding way and that you should tling the panel and creating authority is the same each look at a range of procuretime - the Highways Agency or the Prison Service. The trick will be to apply the benefits of standardised documents to the more decentralised sectors, such as health and local govern-

ment, he says. Ms Heather Morley, a partimplied criticism in Bates that external advisers are largely responsible for excessive costs thrown away on projects that have failed to take off. In the health sector in particular what affects

deals were simply not suitable for PFL she says. "The best way to reduce bidding costs is to ensure you get the method of procurement right. It's when projects fail that money is wasted." she says.

the costs is that many of the

Coopers believes the main problem with PFI is that it has been used too indiscriminately with too many projects going into procurement without a robust options appraisal or without a good business case. The accountant therefore welcomes the emphasis in Bates on priori-

tisation. "The telling phrase in Bates is about PFI being just one method of securing public private partnerships. We have been saying for some are financed off-balance costs, he says.

way and that you should ment options to ensure PFI is the right route for that project. So this is a big change of message," Ms Moriey says.

Many of these sentiments are echoed by Mr Nick Bliss of Freshfields, the City solicitor. Mr Bliss, who worked ner in the Coopers & oo the first two Design, Lybrand PFI unit, rejects the Build, Finance and Operate (DBFO) road schemes to be awarded to the private sector under PFI, says PFI in the beaith sector has been a shambles. "What should beve hap-

have said the best deals for the private sector are those where we know there will be patients afterwards, and concentrated on getting those deals through and sorting out some templates for future projects. The amount of money spent on deals with no chance of success is

He rejects suggestions, bowever, that external advisers are largely to blame for the money wasted and excessive costs thrown away.

an absolute scandal," be

"I accept for the taxpayer any penny not going on a before putting them out to capital asset or providing a service is wasted. But all PFI deals are astoundingly complex largely because most

sheet. So the transaction costs are always going to be

high," he says. He doubts whether standard form contracts are the answer, either. He points to the electricity industry. where, since privatisation, several private power pro-jects have been financed offcalance sheet.

"By the logic of Bates there should be standard contracts to finance a power statioo, but there areo't. There will always be differences from project to project which have to be negotiated. So, although it is a good idea to have a resource of negotiated documents, I don't ever think you will be able to pluck o document out of a hat and say sign that," he

Mr Bliss also has doubts about the viability of the prior approval proposal put forward by Bates. The biggest problem with PFI has been the total tack of commerciality in the public sector, even within the Trea-

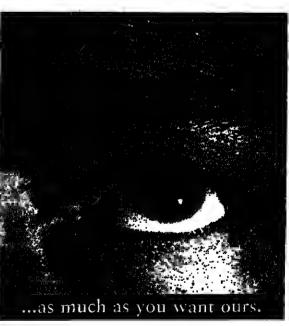

sury, he says. 'What's proposed amounts to a revolution in public sec tor procurement. It's saving to civil servants you've got to do deals and got to take risks and make decisions and lt's against their instincts. So it may be over optimistic to expect projects to be prior-approved.

Mr Brian Pomeroy, of Deloitte & Touche Consulting Group, also has doubts about the prior-approval, or "road testing", of projects by a good throughput of the Treasury taskforce. While it may work for many projects, particularly generic ones, such as bospitals, which will be repeated time and again, Deloitte is concerned that viable projects which seem risky to the public sector may never get off the ground because of the lack of private sector innovation at an early stage.

Mr Pomeroy suggests it would be better to pre-market or market test projects tender. That would allow the private sector to suggest

Don't expect us to see eye to eye on everything.

Whatever the scale of your project, or the complexity of the issues, our team commitment to PFI clients - public and private - is total.

Integrating all the essential skills. Evaluating project and operational risks with expert insight. Sharing them through success related fees.

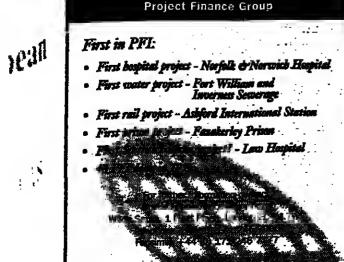

Working with both sides. Bringing tough negotiating skills to the table. And an understanding of government and industry that generates results. Over £4 billion of PFI contracts in the past year.

Mr David Metter, who runs Innisfree, the PF1 investment fund, says that quite apart from specific worries over the involvement of health authorities or local governments in PFI projects, the general climate

has improved for investors. "If you look back two or three years, there was great uncertainty about whether the Labour party would embrace PFl. From a positiun of great uncertainty. you now have the Lahour

Banks have heen very review of the PFI process. interested in the PFI in principle. Around 50 banks, ranging from the very largest UK institutions to the London hranches of overseas banks, have joined a PFI working group set up by the British Bankers' Association. A survey hy the BBA showed that most were "straining at the leash" to fund PFI projects, as soon as they could be satisfied that they were not incurring unacceptably open-ended long-term risks.

The main area of concern for the banks has been the question of vires - the worry that the law does not give non-central government bodies explicit powers to enter into PFI contracts, so raising the risk that a court might was entered into.

many foreign hanks are of Lords ruling in the Hammersmith and Fulham case a decade ago that swaps contracts were ultra vires for local authorities. Several Japanese and French hanks lost large sums on their swaps hooks, and some senior French bankers still start to splutter at the mere mention of the word

"Hammersmith" When the same issue arose for PFI contracts in cases involving the Allerdale and Waltham Forest councils, many hanks were eager not to get caught a second time.

"All we ask is that government provides a sufficient degree of legal certainty that PFI deals will not be declared ultra vires hy the courts or that, if they are, government very positive the contract should not be about PFI and taking some automatically void," the

Although the government has not produced a comprehensive bill authorising PFI deals across the hoard, the measures it has introduced for the health sector and for local government have, from the hanks' point of view. dealt with the hulk of the

vides for tha secretary of state to certify individual deals. That has provided enough comfort to the banks to unblock two large hospi-tal deals, the Norfolk & Norwich and the Dartford & Gravesham, which were at the top of the government's

Association

For local government. which is where the higgest problems have arisen, it is not so easy for central government to certify projects without encroaching on local autonomy. However, bankers believe that the government's proposal for self-certification by local authorities. coupled with a degree of independent oversight about PFI and taking some automatically void," the such as an opinion from the very helpful practical steps," BBA said in a submission to district auditor - should

give them enough of a safe harbour.

Financiers are also enthnsiastic about the government's insistance on prioritising PFI projects.

"We were particularly keen to see that projects were prioritised and that a flagship list ahould be established for each department," said Mr Metter.

These changes will not new legislation gives only open the way for more National Health Service PFI projects, they could also change the methods of finan-

Where most deals have in About 50 banks recent years been asset-based deals, where financing has been mainly by deht, more service contracts are now likely to ha possible, where financing will depend group set up by on a less certain future

income stream.

That will increase the and for equity financin of the sort provided hy Mr Metter's Innisfree fund, as well as hy investors such as Private Equity. Charterhouse, CIBC and 3i. In fact. Mr Metter has

already committed almost half of his £85m fund, and expects to launch another much larger fund next year. The first indications are now also emerging of a market for higher yielding sub-

ordinated deht. midway hetween equity and senior

But PFI deals may not provide the bonanza some bankers are hoping for. Some comparable deals suggest that the pricing benchmarks for PFI may end up at little more than 50 hasis points over Libor. As the logism of deals clears up, some early deals may offer more than that, but the market could tighten quickly.

Success story may lead to controversy

The change of government has meant a rethink on requirement to overcome privately-managed prisons

At a time when many other government departments were still wrangling over tha minute details of launching PFL Prison Service officials could make quiet, satisfied visits to two construction

Bridgend - will house Britain's first PFI-financed prisons, and huilding work on both is now wall advanced. The Liverpool prison is the responsibility of Tarmac and Group 4, and Bridgend a consortium of Securicor, John Seifert, W S Atkins, Costain and Skanska International

Liverpool and Bridgend the first large capital projects to he finalised under PFI. established the Prison Service as one of the initiative's much-needed early

But, with the change of government, the prisons sector has turned from being a model of PFI achievement to its greatest area of potential political controversy. Before the election, Labour opposed the private management of prisons - a policy that had been introduced and gradually expanded by the Conser vatives throughout the 1990s - and this has become a live issue now that it is in gov

Public spending constraints and noward pressures on the prison population last month led to Mr Jack Straw, the Home Secretary, announcing that the private sector will be invited to hulld and run two more new prisons at Agecroft, in Salford, and Pucklechurch, near Bristol. A private-sector contract to manage Blakenhurst prison, in the West Midlands, will also he

renewed. Mr Straw said that, although the invitation to

the private sector to huild forward with proposals and run the two new prisons was "an urgent operational projected abortfalls in accommodation and to avoid dangerous levels of overcrowding," ways would be

sought in the long term to return privately-run prisons to public sector manage-Tha Home Office's ideal outcome would be for tha private sector to design, build and finance new prisons on PFI lines, but not take over their management This reflects a deeply-held view among many Lahour MPs and prison reformers remember that." that custody is an activity that should, on moral

grounds, he confined to employees of the state. Mr Geoffrey Robinson, the paymaster general who is responsible for PFI, said of ment. Privata companies the Homa Secretary'a inten-

which would not involve the private sector managing prisons: "That'a up to him. So long as we get value for money we are not going to try and tell people how to do

"But we shall have a damn good look at it to make sure it does offer value for prisons isn't just that the building is put up better and the maintenance costs are better, but that the running costs are offering improvements. It'a one of the areas that seems to be showing a good saving, although it is very early days. You have to

Even if appropriate financial arrangements could be devised, the private sector would be reluctant to lose its foothold in prison managebelieve they are developing
